1aPLa PLENARY LECTURE

1aPLa1 Future directions in speech information processing .............................. 1
   Sadaoki Furui

1aAA SOUND FIELD FOR THE AUDIENCE, PART 1

1aAA1 Spatial impression as measured in concert and opera auditoria ............ 5
   Michael Barron
1aAA2 Effects of front/back energy ratios of early and late reflections on listener
   envelopment ....................................................................................................... 7
   Masayuki Morimoto and Kazuhiro Iida
1aAA3 Sound strength in concert halls I: Role of the early sound field with objective and
   subjective measures .......................................................................................... 9
   Jerald R. Hyde
1aAA4 Fundamental subjective attributes for sound fields from a model of auditory-brain
   system ............................................................................................................... 11
   Yoichi Ando
1aAA5 Reflected sound field by stage floors in the concert halls: Theoretical model analysis ..... 13
   Shinsuke Nakanishi, Kimihiro Sakagami, and Masayuki Morimoto
1aAA6 A fast room acoustical simulation algorithm based on the free path distribution .... 15
   Michael Vorländer
1aAA7 Relationship between subjective preference for sound fields and brain activity with
   vocal music ......................................................................................................... 17
   Kiminori Mouri and Yoichi Ando
1aAA8 A diagnostic system measuring orthogonal factors of sound fields in a scale model
   of concert hall ................................................................................................. 19
   Masatugu Sakurai, Shinichi Aizawa, and Yoichi Ando
1aAA9 Absorption by seating and audience—whose figures, whose measurement method? ...... 21
   Michael Barron and Steven Coleman

1aAO LONG-RANGE PROPAGATION FOR MEASUREMENT
   OF OCEAN PROCESSES I

1aAO1 Acoustic thermometry of ocean climate: Comparison of acoustic, altimetric and
   historical data .................................................................................................. 23
   Robert C. Spindel, Brian D. Dushaw, Bruce M. Howe, James A. Mercer,
   Bruce D. Cornuelle, Matthew Dzieciuch, Walter H. Munk, Peter F. Worcester,
   Arthur B. Baggeroer, Dimitris Menemenlis, Carl Wunsch, Theodore G. Birdsall,
   Kurt Metzger, Christopher Clark, John A. Colosi, Daniel Costa, and Andrew M. G. Forbes
1aAO2 Computation of T-phase coda ..................................................................... 25
   Catherine de Groot-Hedlin
1aAO3 Coherence analysis of multimegamer range ocean acoustic signals ............ 27
   Matthew Dzieciuch and the ATOC Consortium
1aAO4 Internal wave effects on single frequency coherence, matched field processing and adiabaticity ................................................................. 29
  Kevin D. Heaney, Peter N. Mikhailovsky, Herb Freese, and W. A. Kuperman

1aAO5 Modal leakage in range dependent oceans ........................................ 31
  Arthur B. Baggeroer and Edward K. Scheer

1aAO6 Coupled-mode sound propagation in a range-dependent, moving fluid ........ 33
  Oleg A. Godin

1aAO7 Inversion of multimegometer range acoustic data for ocean temperature .......... 35
  Brian D. Dushaw and the ATOC group

1aAO8 Ray tracing in a turbulent, shallow water channel ............................... 37
  R. Lützen, C. Bjerrum-Niese, and L. Bjørnø

1aBV NOVEL APPROACHES TO ULTRASOUND IMAGING I

1aBV1 Flow function method for the display of streamlines on ultrasonic color flow image .... 39
  Shigeo Ohtsuki and Motonao Tanaka

1aBV2 Non-invasive assessment of wall shear rate (WSR) in humans by means of ultrasound .......................................................... 41
  R. S. Reneman, L. Kornet, S. K. Samijo, P. J. Brands, and A. P. G. Hoeks

1aBV3 Two-dimensional measurement of acoustic properties of tissue using 3–50 MHz ultrasound .......................................................... 43
  Hiroyuki Hachiya, Shigeo Ohtsuki, and Motonao Tanaka

1aBV4 Three-dimensional Doppler ultrasound: A tool for the 21st Century ............... 45
  Roy W. Martin, Dan Leotta, Xian-Ning Li, and Trygve Hausken

1aBV5 Dynamic flow quantitation with spatial orientation guided digital color Doppler imaging: in vitro validation and initial in vivo experience ....................... 47
  Xiang-Ning Li, Jing-Ming Jong, Trygve Hausken, Barbrina Dunmire,
  Bryan Goldman, Daniel F. Leotta, Kirk W. Beach, and Roy W. Martin

1aBV6 Doppler monitoring of hemodialysis grafts ........................................... 49
  Kirk W. Beach, Marla Paun, Suhail Ahmad, Curtis Plett, Robert Hickman,
  and D. Eugene Strandness, Jr.

1aBV7 Using Doppler ultrasound to examine wall vibrations and flow velocity fluctuations in arteries .......................................................... 51
  Melani Plett, Kirk Beach, Marla Paun, Kathy Brown, Barbrina Dunmire,
  and D. Eugene Strandness, Jr.

1aEA UNDERWATER ACOUSTIC CALIBRATION, METHODS, AND DEVICES

1aEA1 Towards new UK underwater acoustical measurement standards in the 21st century .......................................................... 53
  Roy C. Preston and Stephen R. Robinson

1aEA2 Acoustic calibration in reverberant environments: A survey of USRD measurement methodology .................................................. 55
  S. E. Forsythe and P. L. Ainsleigh

1aEA3 Low-frequency calibration in water-filled pipes ....................................... 57
  L. D. Luker and J. F. Zalesak

1aEA4 A comparison of hydrophone calibration by free-field reciprocity and by optical interferometry in the frequency range 200 kHz to 1 MHz ....................... 59
  Stephen P. Robinson and Roy C. Preston

1aEA5 An intercomparison of hydrophone calibrations within Europe ..................... 61
  Stephen P. Robinson, Roy C. Preston, and Geraint J. Green

1aEA6 A simple two-projector procedure for producing impedance-controlled wavefields for transducer calibration .................................... 63
  S. E. Forsythe and A. L. VanBuren

1aEA7 Underwater facility for automated experimentation and measurement ............ 65
  Carlos Ranz-Guerra and Pedro Cobo-Parra
1aEA8  Calibration of a neutrally buoyant \( u-u \) intensity probe ........................................ 67
    Kevin J. Bastyr and Gerald C. Lauchle
1aEA9  Calibration of a neutrally buoyant \( p-u \) intensity probe ........................................ 69
    James A. McConnell and Gerald C. Lauchle
1aEA10 Test chamber for determining damage thresholds for high amplitude underwater
      sound exposure in animal models .......................................................... 71
    Thomas N. Lewis, Peter H. Rogers, James S. Martin, George S. McCall,
    Joey G. Lloyd, Henry P. Cotten, and Gary W. Caille
1aEA11 A free-flooding rare earth iron hexagonal transducer ....................................... 73
    Rong Rong Zhao

1aMU SIGNAL MODELING IN MUSIC SYNTHESIS AND PROCESSING

1aMU1  An analysis/synthesis tool for transient signals ............................................. 75
    Tony S. Verma and Teresa H. Y. Meng
1aMU2  Lemur: A bandwidth-enhanced sinusoidal modeling system .............................. 77
    Kelly Fitz and Lippold Haken
1aMU3  Synthesis and control of synthesis using a generalized diphane method ................ 79
    Xavier Rodet and Adrien Lefèvre
1aMU4  Sound representation and modification with multiresolution sinusoidal models ...... 81
    Michael Goodwin, Paolo Prandoni, and Martin Vetterli
1aMU5  Timbre morphing and interpolation based on a sinusoidal model ......................... 83
    Naotoshi Osaka
1aMU6  Tracking the frequency components of musical tones based on global waveform
        fitting ................................................................................................. 85
    Yinong Ding
1aMU7  Efficient synthesis model for bowed strings using a nonlinear bow-string interaction
        model ................................................................................................. 87
    Julius O. Smith, III

1aNSa NON-AUDITORY EFFECTS OF NOISE ON HEALTH

1aNSa0  The non-auditory health effects of noise exposure ............................................. 89
    Lawrence Finegold
1aNSa1  Study of noise levels in a neonatal intensive care unit ..................................... 91
    Chantal Laroche and Paula Fournier
1aNSa2  Trading level for number in the laboratory: Differential effects of aircraft noise on
        cardiovascular activation, annoyance, and assessment of quality of life ............. 93
    Iris B. Mauss, Joachim Vogt, and Karl Th. Kalveram

1aNSb NOVEL APPROACHES TO NOISE CONTROL BARRIERS I

1aNSb1  Excess attenuation by reactive obstacle at noise barrier edge ........................... 95
    K. Fujiwara, C. Kim, and T. Ohkubo
1aNSb2  Jagged-edge noise barriers ............................................................................... 97
    P. Menounou, I. J. Busch-Vishniac, and D. T. Blackstock
1aNSb3  Comparison of calculated and measured data for the attenuation of improved noise
        barrier ................................................................................................. 99
    Kohei Yamamoto
1aNSb4  Active control of traffic noise around barriers ................................................. 101
    D. Duhamel
1aNSb5  Active noise barrier based on the boundary surface control .............................. 103
    S. Ise and H. Tachibana
1aNSb6  Traffic noise barrier overlap gap study ........................................................... 105
    Lloyd A. Herman, Craig M. Clum, and E. W. Pinckney
1aNSb7  Acoustic properties of rubber crumbs  ............................................. 107
          Jaime Pfretzschner and Rosa Mª Rodriguez

1aPAa OUTDOOR SOUND PROPAGATION I

1aPAa1  Propagation of sonic booms through the atmosphere  ............................................. 109
          Richard Raspet, Henry E. Bass, and Mark Kelly
1aPAa2  Atmospheric sound propagation near the ground  ............................................. 111
          Conny Larsson
1aPAa3  Effect of waveform distortion on sonic boom noise penetration into a flat ocean  .......... 113
          Tracie J. Ferguson and Victor W. Sparrow
1aPAa4  Sonic boom in the shadow zone  .......................................................... 115
          François Coulouvrat
1aPAa5  Statistical data of excess attenuation for long range noise propagation over sea  .......... 117
          Kazuo Konishi and Zyun-iti Maekawa
1aPAa6  Sound propagation in a city composed with hexagonal periodic buildings  ................. 119
          Judicael Picaut and Jean Hardy
1aPAa7  Scale model experiments on the insertion loss of double and wide barriers  ............... 121
          Glenn J. Wadsworth and James P. Chambers
1aPAa8  Incorporation of inhomogeneous atmospheric turbulence into numerical propagation calculations  .......................................................... 123
          D. Keith Wilson
1aPAa9  Nonlinear aspects on outdoor propagation of acoustic pulses produced by weak explosions  .............................................................................. 125
          Antonio Moreno, Carlos de la Colina, and Francisco Simón

1aPAb GENERAL TOPICS IN NONLINEAR ACOUSTICS

1aPAb1  Steady streaming from a non-compact sphere  ............................................. 127
          Ashok Gopinath and Eugene H. Trinh
1aPAb2  Acoustic radiometer demonstration  .................................................. 129
          Timothy G. Simmons, Bruce Denardo, André Larrazá, and Robert Keolian
1aPAb3  An acoustic Casimir effect  .............................................................. 131
          André Larrazá, Christopher D. Holmes, Robert T. Susbilla, and Bruce Denardo
1aPAb4  Research of finite amplitude acoustic pulse propagation in thin capillary filled with viscous fluid  .............................................................................. 133
          Igor B. Esipov and Vladislav G. Mikhailovich
1aPAb5  Stabilization of a capillary bridge far beyond the Rayleigh-Plateau limit using active feedback and acoustic radiation pressure  .............................................................................. 135
          Mark J. Marr-Lyon, David B. Thiessen, and Philip L. Marston
1aPAb6  BSA-bearing drop dynamics in microgravity  ............................................. 137
          Xiaohui Chen and Robert Apfel
1aPAb7  The study of evaporation of multicomponent drops using an acousto-electric levitator  .............................................................................. 139
          Yibing Zheng, Robert E. Apfel, and Yuren Tian
1aPAb8  Particle separation by ultrasonic forces  ............................................. 141
          Steven M. Woodside, Martin Gröschl, Ewald Benes, James M. Piret, and Bruce D. Bowen
1aPAb9  The two-dimensional acoustic standing wave and its application in a coagulation of aerosols  .............................................................................. 143
          Henryka Czyż

1aPAc CAVITIES AND RESONATORS

1aPAc1  Physical effects of macrosonic standing waves in oscillating cavities  ..................... 145
          Christopher C. Lawrenson, Bart Lipkens, and Thomas W. Van Doren
1aPAc2 Investigation of particle velocity field in nonlinear standing waves .......................... 147
Yuri A. Ilinskii, Bart Lipkens, and Evgenia A. Zabolotskaya

1aPAc3 Parametric excitation of a Helmholtz resonator .................................................. 149
Wayne E. Prather, Bruce Denardo, and Richard Raspet

1aPAc4 Measurements of temperature and velocity oscillations in acoustic waves .............. 151
Guadalupe Huelsz, Francisco López-Alquicira, and Eduardo Ramos

1aPAc5 Acoustic methods for transport properties measurements in gases .......................... 153
K. A. Gillis, J. B. Mehl, and M. R. Moldover

1aPAc6 Optical techniques for sound generation and detection in acoustic resonators ............. 155
Giuliana Benedetto, Roberto M. Gavioso, and Renato Spagnolo

1aPAc7 Numerical study of one-dimensional resonant gas oscillation in a closed tube .......... 157
Takeru Yano

1aPAc8 The use of a subgrid-scale quasi-stationary approximation in finite-difference time-
domain simulations to calculate the absorption by Helmholtz resonators ........................ 159
J. De Poorter and D. Botteldooren

1aPP PITCH—HIGH AND INSIDE, LOW AND AWAY

1aPP1 Pitch of pure tones measured by absolute magnitude estimation .............................. 161
Andrzej Rakowski and Andrzej Miśkiewicz

1aPP2 Regular interval stimuli with more than one pitch .............................................. 163
William A. Yost

1aPP3 New experiments beyond the traditional Fourcin pitch range .................................. 165
Johan Raatgever, Frans A. Bilsen, and Reshma Mungra

1aPP4 Comparing the accuracy of monotic and dichotic repetition pitch .............................. 167
Frans A. Bilsen, Han H. Dols, and Johan Raatgever

1aPP5 Spectral weights for pitch judgement ................................................................. 169
Huaping Dai

1aPP6 Pitch mechanisms for unresolved harmonics I: Duration effects ............................... 171
Louise J. White and Christopher J. Plack

1aPP7 Pitch mechanisms for unresolved harmonics II: Sensitivity to envelope phase .......... 173
Christopher J. Plack and Louise J. White

1aPP8 Co-operative behavior in the Fitzhugh-Nagumo neuron: Consequences for acoustic
perception ......................................................................................................................... 175
J. Tapson

1aPP9 The role of global processes in the perceptual cohesion of harmonic complex tones ..... 177
Jeffrey M. Brunstrom and Brian Roberts

1aPP10 Accentuation of spectral pitch .................................................................................. 179
Werner A. Deutsch

1aPP11 Perceptual segregation and pitch shifts of mistuned components in harmonic
complexes and in regular inharmonic complexes ............................................................ 181
Brian Roberts and Jeffrey M. Brunstrom

1aSA ANALYTICAL METHODS IN RADIATION AND SCATTERING

1aSA1 Algebraic aspects of acoustic scattering ................................................................. 183
Elisabeth Fournier, Yves Decanini, Antoine Folacci, and Paul Gabrielli

1aSA2 Free and forced vibration of a multi-supported string ................................................ 185
Benjamin A. Cray and Albert H. Nuttall

1aSA3 Eigenvalues gap optimization using sensitivity in coupled acoustic-structural
systems ............................................................................................................................... 187
Walter Pauca Casas and Renato Pavanello

1aSA4 A modal approach for the acoustic and vibration response of an elastic cavity with
absorption treatments and mechanical/acoustical excitation ............................................ 189
Noureldine Atalla and Michel A. Tournour

1aSA5 Acoustic response to large structural perturbations ................................................... 191
Steven R. Hahn and Aldo A. Ferri
| 1aSA6 | Synthesis of radiated sound field from a vibrating plate-strip with free edges | Kai-Ulrich Machens |
| 1aSA7 | A modal formulation for an arbitrary submerged structures in a heavy acoustic medium | Pei-Tai Chen |
| 1aSA8 | Finite difference studies of structural-acoustic interaction | U. R. Kristiansen |
| 1aSA9 | Dispersion free finite element methods for Helmholtz equation | Paul E. Barbone and Isaac Harari |
| 1aSA10 | A wave based prediction technique for vibro-acoustics: Comparison with finite element technique and experimental validation | Paul Sas, Wim Desmet, and Dirk Vandepitte |

| 1aSC | SPEECH TECHNOLOGY AND SPEECH RECEPTION |
| 1aSC1 | Detection and intelligibility of talkers in competing message environment | Mark A. Ericson, Robert S. Bolia, and W. Todd Nelson |
| 1aSC2 | The enhancing effect of subsequent context on perception of the sentence-initial word | Takayuki Kawashima, Makio Kashino, and Takao Sato |
| 1aSC3 | Effects of context-sensitive phonetic variation and lexical structure on the uniqueness of words | Edward T. Auer, Jr. and Lynne E. Bernstein |
| 1aSC4 | Amplitude modulation cues for perceptual voicing distinctions in noise | Brian P. Strope and Abeer A. Alwan |
| 1aSC5 | Effects of context on time-compressed speech intelligibility in older adults | Nancy E. Vaughan and Ronda K. Kasper |
| 1aSC6 | Dichotic presentation of speech signal using critical filter bank for bilateral sensorineural hearing impairment | D. S. Chaudhari and P. C. Pandey |
| 1aSC7 | A new method of sequential information analysis in consonant confusions | Tan Chin Tuan, Tong Yit Chow, and Joseph Chang |
| 1aSC8 | Aural method of speech intelligibility enhancement | Wojciech J. Majewski |
| 1aSC9 | A training system to improve the usefulness of hearing aids | Takashi Ikeda, Akira Watanabe, Mitsuaki Hino, and Yuichi Ueda |
| 1aSC10 | Voice transmission through vibration pickups | Paolo E. Giua |
| 1aSC11 | Enhancing second formant identification in speech by listeners with significant hearing loss | Peggy B. Nelson and Sally G. Revoile |
| 1aSC12 | Subjective vs. objective intelligibility of sentences in listeners with hearing loss | Kathleen M. Cienkowski, Charles E. Speaks, and Amy S. McKee |
| 1aSC13 | Effects of stimulation mode on speech recognition by cochlear implant users | Qian-Jie Fu and Robert V. Shannon |
| 1aSC14 | Continuous assessment and modeling of speech transmission quality | Martin Hansen and Birger Kollmeier |
| 1aSC15 | Coherence-based subband decomposition for efficient reverberation and noise removal in enclosed sound fields | Joaquin Gonzalez-Rodriguez and Javier Ortega-Garcia |
| 1aSC16 | Continuous digit speech recognition using subword unit HMM juncture | Jeh-Seon Youn and Kwang-Seok Hong |
| 1aSC17 | Stochastic word models for articulatory constrained speech recognition and synthesis | John Hogden, David Nix, Vincent Gracco, and Philip Rubin |
| 1aSC18 | Elliptical wave radiation from curved waveguides | ROLPHE F. FEHLMANN |
1aSC19  An efficient Korean speech recognition for name and digit on communication network  .......................................................... 239
    Hyeon-Gu Lee and Kwang-Seok Hong
1aSC20  A comparative study on three automatic speech recognizers in noise  .................. 241
    Chin Tuan Tan, Yit Chow Tong, Joseph S. Chang, and Lai Peng Chan
1aSC21  An implementation of recognition for Windows 95 commander  .......................... 243
    Seong-kwon Lee and Soon-Hyob Kim
1aSC22  Fractal modeling of glottal waveform for high quality speech synthesis .............. 245
    Naofumi Aoki and Tohru Ifukube
1aSC23  Interactive Korean speech recognition for a mobile robot  .................................. 247
    Seok-Hyun Yoon, Jae-Young Lee, Kwang-Woo Chung, and Kwang-Seok Hong
1aSC24  Synthesis of fricative sounds using an aeroacoustic noise generation model ......... 249
    Daniel J. Sinder, Michael H. Krane, and James L. Flanagan
1aSC25  Glottal source parameter estimation by comparison of measured signals with simulated signals  ................................................ 251
    David G. Druker, Ingo R. Titze, and Brad H. Story
1aSC26  SGP analysis of excised larynges in anechoic chamber  ........................................ 253
    P. F. Castellanos, Sang Hong, Craig Skinner, and S. A. Elder
1aSC27  Perceptual effects of spectral envelope and F0 manipulations using STRAIGHT method ............................................................ 255
    Hideki Kawahara and Reiko Akahane-Yamada
1aSC28  Modeling and synthesis of the lateral consonant /l/ .......................................... 257
    Adrienne M. Prahler
1aSC29  End corrections in an acoustic model of the vocal tract ..................................... 259
    Jianwu Dang
1aSC30  Modeling the transitory behavior of speech using a time-varying transmission-line model .......................................................... 261
    Amit S. Rane, Derrick C. Wei, Lisa E. Falkson, and Abeer A. Alwan
1aSC31  Pitch-synchronous decomposition of mixed-source speech signals .................... 263
    Philip J. B. Jackson and Christine H. Shadle
1aSC32  Automatic creation of CV templates for formant type speech synthesis based on HMM-based segmentation and syllable boundary detection ............................................ 265
    Takahiro Ohtsuka, Chang-Sheng Yang, and Hideki Kasuya
1aSC33  A study on natural-sounding Japanese phonetic word synthesis based on the pitch waveform concatenation ........................................ 267
    Yasuhiro Arai, Ryo Mochizuki, and Takashi Honda
1aSC34  The Hablarte text-to-speech system for Spanish ................................................ 269
    Helen E. Karn
1aSC35  Pitch controlled variable bitrate CELP speech coding ..................................... 271
    Robert M. Oberhofer and Frank J. Owens
1aSC36  Assessment of the intelligibility and perceived quality of speech produced by text-to-speech engines .............................................. 273
    Michael D. Hall, Erica B. Stevens, Richard Eyraud, Denise Padden, and Patricia K. Kuhl
1aSC37  Acoustic-phonetic features for the automatic recognition of stop consonants ........ 275
    Ahmed M. Abdelatty Ali, Jan Van der Spiegel, and Paul Mueller
1aSC38  An 800bps VQ based LPC voice coder .............................................................. 277
    Huan Chen, Xianglin Wang, and C.-C. Jay Kuo
1aSC39  A study on the speech analysis and recognition for Korean children ................. 279
    Eunjung Park, Ji-eun Kam, Inchan Paek, Y. Kwon, Sungil Yang, and K. S. Lee

1aSP MODELING AND SYSTEM IDENTIFICATION

1aSP1  Signal models for model-based array processors ................................................ 281
    E. J. Sullivan and J. V. Candy
Simulation of the effects of thermal turbulence on beamforming and time reversal techniques using Gaussian beam summation and Fourier modes superposition techniques

Christian Lhuillier, David Fiorina, and Daniel Juvé

Advanced system identification techniques for acoustics enhancement

Yuchang Cao and Mark Poletti

Convergence characteristics of frequency-domain LMS adaptive filters

Karl M. Reichard and David C. Swanson

A simple genetic algorithm for active noise control

Antonio Minguez and Manuel Recuero

Reducing sibilants in recorded speech using psychoacoustic models

Markus Sapp, Martin Wolters, and Jörg Becker

Machine recognition of Hindi consonants and distinctive features using vector quantization

Pradip K. Das and S. S. Agrawal

Synthesis of Hindi consonants with naturally sounding quality using PC based Klatt synthesiser

Rajesh Verma and Shyam S. Agrawal

A rejection method for the isolated word recognition system

Dong-hwa Kim, Hyung-Soon Kim, and Young-Ho Kim

Telemetry and the underwater channel: Progress and challenges

Arthur B. Baggeroer and Daniel B. Kilfoyle

Environmental impact on phase coherent underwater acoustic communications

T. C. Yang and A. Al-Kurd

Observations of coherence time and amplitude fluctuations in a shallow-water acoustic communications channel

Richard Shockley, Joseph Rice, Vincent McDonald, Dale Green, John Proakis, and John Newton

Experimental performance of concatenated coding in shallow water channels

Daniel B. Kilfoyle

Low-probability-of-detection communications in adverse underwater acoustic channels

Dale Green and Joseph A. Rice

Performance evaluation of phase coherent underwater acoustic communications during the LWAD 98-1 experiment

A. Al-Kurd, T. C. Yang, J. Schindall, and E. Carey

Adaptive array processing for acoustic communications through time-varying ocean channels

James C. Preisig

Phase-encoded frequency-hopped signaling for underwater acoustic communications

Geoffrey S. Edelson and Bradford W. Gillespie

Spectral shaping in MFSK modulation for underwater acoustic communications

Richard C. Shockley, John G. Proakis, Milica Stojanovic, and Joseph A. Rice

Doppler tolerant link (DTL)

Anthony D. Matthews and Robert L. Higginbotham

Acoustical studies of the upper ocean boundary layer

David M. Farmer
## 1pPLa PLENARY LECTURE

| 1pPLa1 | Sound transmission through suspended ceilings | F. P. Mechel | 323 |

## 1pAAa OPERA HOUSE ACOUSTICS: STATE OF THE ART

| 1pAAa1 | The development of room acoustical demands on operas within the last 50 years | Gerhard Müller and Helmut A. Müller | 327 |
| 1pAAa2 | Alternate venues for opera performances. Wagner started it...should we retreat now? | Christopher Jaffe | 329 |
| 1pAAa3 | Orchestra pit acoustics—From Bayreuth to Broadway | Mark Holden | 331 |
| 1pAAa4 | Why do traditional opera houses work so well for opera? | Nicholas Edward and David Kahn | 333 |

## 1pAAb SOUND FIELD FOR SINGER AND ORCHESTRA, PART 1

| 1pAAb1 | Measurement of objective criteria for performers in the “Teatro di San Carlo” opera house | Carmine Ianniello, Gino Iannace, Luigi Maffei, and Rosario Romano | 335 |
| 1pAAb2 | Sound fields in orchestra pits | Jurgen Meyer | 337 |
| 1pAAb3 | Listening in the pit | Christopher N. Blair | 339 |
| 1pAAb4 | Small scale modelling of stage to pit balance—A pilot study | John O’Keefe | 341 |
| 1pAAb5 | Compromises in orchestra pit design: A ten year trench war in The Royal Theatre, Copenhagen | Anders Chr. Gade and Bo Mortensen | 343 |
| 1pAAb6 | Study on experimental equations for on-stage acoustics design | Shun-ichi Nakamura | 345 |
| 1pAAb7 | Orchestra platform acoustics. When will reflecting surfaces give “Box-Klangfarbe”? | Tor Halmrast | 347 |

## 1pAAC ROOM ACOUSTIC MEASUREMENT TECHNIQUES, ABSORPTION AND DIFFUSION

<p>| 1pAAC1 | Measurements and modelling of commonly used resilient channels in light weight floor structures | Jonas Brunskog and Per Hammer | 349 |
| 1pAAC2 | Evaluation of the flanking transmission in a scale model of two adjoining rooms | Alessandro Cocchi, Giovanni Sempriini, and Simone Secchi | 351 |
| 1pAAC3 | Classical analysis of multilayered walls transmission loss in comparison with F.E.M. and S.E.A. approach | Marco Fringuellino, Claudio Guglielmone, and Sean Smith | 353 |
| 1pAAC4 | Optimisation of techniques for field testing of buildings | George Dodd | 355 |
| 1pAAC5 | Loss factor at boundary of single-leaf wall under vibrational field of diffused bending waves | Souichiro Kuroki and Masahito Yasuoka | 357 |
| 1pAAC6 | Transmission loss measurement of multi-layered partitions in time domain | André L. Cherman and Roberto A. Tenenbaum | 359 |</p>

| 1pPa1 | Surface waves over a convex impedance ground | Kai Ming Li and Qiang Wang | 477 |
| 1pPa2 | Modeling the effects of refraction and diffraction on wave propagation in a 3-D turbulent atmosphere | Kenneth E. Gilbert and Xiao Di | 479 |
| 1pPa3 | Scattering of acoustic impulse waveforms by turbules | C. G. Don and I. D. McLeod | 481 |
| 1pPa4 | Sound propagation through time-dependent random media | Philippe Blanc-Benon, Kevin Wert, and Daniel Juvé | 483 |
| 1pPa5 | Acoustic measurements in an airport environment and the identification of the sound radiated by aircraft wake vortices | Neal Fine, Frank Rees, and William Von Winkle | 485 |
| 1pPa6 | Spectral element analysis of sound propagation in a muffler | Wen H. Lin, Daniel C. Chan, and Munir M. Sindir | 487 |
| 1pPa7 | The effects of turbulent intermittency on scattering for varying degrees of saturation | David E. Norris, D. Keith Wilson, and Dennis W. Thomson | 489 |
| 1pPa8 | The effects of atmospheric turbulence on the cross correlation between wind and travel time fluctuations | David E. Norris, Leif Kristensen, Jakob Mann, Dennis W. Thomson, and David C. Swanson | 491 |
| 1pPa9 | Acoustic determination of scale and structure constants in fluctuating fluid | Volker Mellert and Bernhard Schwarz-Röhr | 493 |
| 1pPa10 | Model experiments and predictions of sound field in a downward refracting medium | Qiang Wang and Kai Ming Li | 495 |
| 1pPa11 | Inclined acoustic sounding of the atmospheric boundary layer | I. P. Chunchuzov | 497 |
| 1pPa12 | Calculation of sound reduction by a screen in a turbulent atmosphere using the parabolic equation method | Jens Forssén | 499 |

### 1pPb SCATTERING FROM FLUID-LOADED OBJECTS

| 1pPb1 | Scattering by partially-buried shells | Raymond Lim | 501 |
| 1pPb2 | Visualization of the energy flux in an ensonified fluid loaded elastic sphere | Cleon E. Dean and James P. Braselton | 503 |
| 1pPb3 | Experimental measurements and theoretical modelling of acoustic scattering by a cube | Victor F. Humphrey, Jingdong Zhang, and Paul A. Chinnery | 505 |
| 1pPb4 | Direct and inverse obstacle scattering by shape deformation | D. N. Ghosh Roy, Luise Couchman, and Jeremy Warner | 507 |
| 1pPb5 | The scattering of hydrodynamic flow into sound by solid bodies—An alternative derivation of Howe's formula | Dan Lin and Alan Powell | 509 |
| 1pPb6 | Interaction of an acoustic plane wave with a circular elastic plate in water | Yannick Eudeline, Hugues Duflot, Jean-Louis Izbicki, and Jean Duclos | 511 |
| 1pPb7 | Scattering by an elastic cylinder buried in a sedimentary fluid media | Arnaud Coatanhay and Jean-Marc Conoir | 513 |
| 1pPb8 | Transient diffraction of a plane step pressure pulse by a hard sphere—Neoclassical solution | H. Huang and G. C. Gaunaurd | 515 |
1pPAb9 Bistatic sonar cross-sections and time-frequency signatures of simple targets
insonified by an acoustic pulse .............................................................. 517
Guillermo C. Gaunaurd and Hans C. Strifors

1pPAb10 New results for diffraction from an impedance wedge .................. 519
Andrew N. Norris and Andrey V. Osipov

1pPAb11 Physical nature of the first circumferential wave of a Lucite cylinder immersed in water ................................................................. 521
Farid Chati, Fernand León, and Gérard Maze

1pPAb12 A new model to predict echoes of large, smooth targets, with finite dimensions transducers, at a low cpu cost ................................................................. 523
J. L. Berton, C. Riffard, D. Dedieu, and C. Dominjon

1pPAb13 Prediction of echoes from small targets: Modelisation and application to a telemetry problem ............................................................ 525
C. Riffard, J. L. Berton, and C. Estienne

1pPAb14 Matrix theory of elastic resonance scattering ................................ 527
Myoung-Seon Choi

1pPAc NONLINEAR WAVE PROPAGATION IN FLUIDS

1pPAc1 New symmetries and conservation laws for lossless KZK equation .... 529
Oleg A. Sapozhnikov and Andrei G. Kudryavtsev

1pPAc2 Nonlinear wave propagation from a discrete annular array: Theory .... 531
Steven G. Kargl, Ronald A. Roy, and Patrick Edson

1pPAc3 Nonlinear wave propagation from a discrete annular array: Experiments .... 533
Patrick Edson, Ronald A. Roy, and Steven G. Kargl

1pPAc4 On the asymmetric shape of shock waves in focused sound fields .... 535
Halvor Hobæk

1pPAc5 Parametric efficiency of a bi-frequency focusing Gaussian nonlinear source .... 537
M. Serhat Özyar

1pPAc6 Generation of harmonics in the nearfield of finite amplitude sources .... 539
Eugeniusz Kozaczka and Grażyna Grelowska

1pPAc7 Raman-Nath diffraction caused at the focal point of a concave type transducer .... 541
Yoshiaki Watanebe, Hiromaka Miyaki, and Keisuke Fujita

1pPAc8 Parameter sensitivity in nonlinear and dissipative time-reversed acoustics .... 543
Claes M. Hedberg

1pPAc9 Induced transparency of an acoustical waveguide, containing a liquid with nonlinear viscosity ...................................................... 545
O. M. Zozulya

1pPAc10 Application of the three-wave interaction to the problem of acoustical monitoring of complicated media ............................................. 547
S. A. Rybak

1pPAc11 Application of nonlinear interaction of sound waves in sound reproduction .... 549
Dong Weiguo, Wu Qunli, and Ling Shih Fu

1pPP PERIPHERAL PROCESSES, MODELS AND LOUDNESS

1pPP1 Frequency-dependent saturation in inner hair cell responses .............. 551
M. A. Cheatham and P. Dallos

1pPP2 Linear and nonlinear modeling techniques for cochlear mechanics .......... 553
Karl Grosh, Anand A. Parthasarathi, and Alfred L. Nuttall

1pPP3 Rejecting a cochlear-partition model with constant mass .................... 555
Timothy A. Wilson

1pPP4 Determination of roots of eikonal equation for WKB solution in cochlear models .... 557
Anand A. Parthasarathi, Karl Grosh, and Alfred L. Nuttall

1pPP5 A signal detection theoretic analysis of the Carney model of auditory processing .... 559
Leslie M. Collins and Lisa C. Gresham
1pPP6  Signal detection theoretic analysis of auditory processing: Phase uncertainty and multiple channel integration ................................................................. Lisa C. Gresham and Leslie M. Collins
1pPP7  A descriptive model of under- and over-shoot patterns in the temporal masking function of a narrowband noise ............................................. C. Fornby, J. C. Rutledge, M. G. Heinz, L. P. Sherlock, and I. V. Aleksandrovsky
1pPP8  Detection of an increment in a single frequency component of a noise background as a function of increment frequency and duration ........................................ C. Fornby, M. G. Heinz, and I. V. Aleksandrovsky
1pPP9  A unified theory of two-tone suppression and the upward-spread of masking ................. J. B. Allen and D. Sen
1pPP10 Equal-loudness relations at high frequencies: Implications for loudness growth ................ Rhona Hellman, Hisashi Takeshima, Yōiti Suzuki, Kenji Ozawa, Takanori Yamaguchi, Yusaku Sasaki, and Toshio Sone
1pPP11 Global and continuous judgements of sounds with time-varying intensity: Cross-modal matching with a proprioceptive input device ........................................ Patrick Susini and Stephen McAdams
1pPP12 On the effects of a subharmonic masker on the loudness of a pure tone ......................... Kenji Ozawa, William Hellman, Yoshinori Inoue, Yoiti Suzuki, and Toshio Sone

1pSA RADIATION AND SCATTERING FROM ELASTIC STRUCTURES

1pSA1  Sound scattering by a fluid-loaded finite cylindrical shell ........................................... Aleksander Klauson, Jaan Metsaveer, Nicolas Touraine, Dominique Déculotot, and Gérard Maze
1pSA2  Meridional and helical ray contributions to backscattering by titled cylindrical shells: High frequency tone burst and wide bandwidth measurements and interpretation ................................................................................. Scot F. Morse and Philip L. Marston
1pSA3  A method of target characterization based on the analysis of Scholte-Stoneley and Lamb-type waves scattered by submerged fluid-filled thin-walled shells .......................................................... Alessandra Tesei, Warren L. J. Fox, Alain Maguer, and Arne Lavik
1pSA4  Scattering from elastic targets near a planar boundary ................................................... Garner C. Bishop and Judy Smith
1pSA5  Convolution formulation for high-frequency leaky wave scattering enhancements for solids and shells with truncations: Evaluation of the surface integral and experimental and computational tests ................................................................. Philip L. Marston, Karen Gipson, and Scot F. Morse
1pSA6  Vibroacoustical modelling and modal analysis of a double wall panel ........................... S. J. Pietrzko
1pSA7  Angular distribution of incident sound energy for estimating the sound transmission loss of multi-layered panels .................................................... Hyun-Ju Kang, Hyun-Sil Kim, Jae-Seung Kim, Sang-Ryul Kim, and Jeong-Guon Ih
1pSA8  An analytical model for band-limited response of vibroacoustic systems ........................ K. S. Sum and J. Pan
1pSA9  Optimization procedures for strain sensing in active structural acoustic control .......... P. Masson and A. Berry
1pSA10 Measurements and modeling of the transient acoustic field at impacted plates ................ Antoine Chaigne, Christophe Lambourg, and Staffan Schedin
1pSA11 Nearfield acoustic source identification based on numerical models and operational pressure data ................................................................................................. Paul Sas and Peter Mas
1pSA12 Visualization of sound field generated by plate-cavity coupled system using acoustic holography .............................................................. Yang-Hann Kim and Sea-Moon Kim
1pSC THE STATE OF THE ART IN SPEECH TECHNOLOGY

1pSC1 Building acoustic models for speech recognition .......................................................... 599
Francesco Scattone

1pSC2 Spoken language technology research at Microsoft .................................................. 601
X. D. Huang

1pSC3 Recent activities in spoken language processing at LIMSI ........................................ 603
Jean-Luc Gauvain and Lori Lamel

1pSC4 Recent advances in speech recognition at IBM Research ........................................ 605
Ponani S. Gopalakrishnan

1pSC5 Research and development of robust speech recognition .......................................... 607
Kiyoaki Aikawa

1pSC6 21st century user interfaces within the telecommunication industry: Speech processing is the key .......................................................... 609
Jay Wilpon

1pSC7 Natural speech dialogue systems ................................................................................. 611
Volker Steinbiss

1pSC8 Recent advances in speech recognition for spontaneous speech translation ............ 613
Yoshinori Sagisaka

1pSC9 Speech trends and predictions, or do we need text? .................................................. 615
Patti Price

1pSC10 From speech recognition to understanding: Shifting the paradigm to achieve natural human-machine communication ........................................ 617
B. H. Juang

1pSP NON-STATIONARY AND WAVELET PROCESSING METHODS

1pSP1 Improvement of pitch detection using signal specific analyzing wavelet .................... 619
Yoshifumi Chisaki, Tsuyoshi Usagawa, and Masanao Ebata

1pSP2 Comparison between DyWT- and EGG-based estimation of glottal closure instant for speech signal .............................................................. 621
Jongwon Seok, Youngho Son, and Keunsung Bae

1pSP3 A novel endpoint detection method for noisy speech signal .................................... 623
Jongwon Seok and Keunsung Bae

1pSP4 Speech enhancement by a Kalman filter based on wavelet transformation coefficients ................................................................................. 625
Ryouichi Nishimura, Futoshi Asano, Yōiti Suzuki, and Toshio Sone

1pSP5 Time variation characterization of a nonstationary time series .................................. 627
Nai-chyuan (Nate) Yen

1pSP6 Comparison of methods for analysis of cyclostationary noise .................................. 629
Karel Vokurka

1pUW SOURCES, ARRAYS, TRACKING AND LOCALIZATION

1pUW1 Localized wave pulses in the Keyport experiment .................................................... 631
David H. Chambers and D. Kent Lewis

1pUW2 Localized wave generation with a standard underwater array ................................. 633
D. Kent Lewis, David H. Chambers, Christopher S. Mullin, and Richard W. Ziolkowski

1pUW3 An inexpensive lightweight ocean acoustic research array .................................... 635
Garry J. Heard and Wayne Higgins

1pUW4 Optimal array element localization ............................................................................ 637
Stan E. Dosso and Barbara J. Sotirin

1pUW5 Detection and tracking of a moving source with application to real data (SWellEx-3) .......................................................... 639
Stacy L. Tantum and Loren W. Nolte

1pUW6 Characterization of fault processes in central Arctic ice .......................................... 641
Catherine Stamoulis and Ira Dyer
1pUW7 A time-reversal mirror with variable depth focusing ................................. 643
   H. C. Song, W. A. Kuperman, W. S. Hodgkiss, T. Akal, C. Ferla, and D. R. Jackson
1pUW8 A piecewise matched-field tracking algorithm ................................. 645
   Michael J. Wilmut and John M. Ozard
1pUW9 Effects of environmental mismatch on broadband Bartlett sidelobe structures .... 647
   Aaron M. Thode, Gerald L. D’Spain, Hee Chun Song, and William A. Kuperman
1pUW10 A PE-based backpropagation algorithm for matched-field processing .......... 649
   David J. Thomson, Gordon R. Ebbeson, and Brian H. Maranda
1pUW11 Regularized matched-mode processing ........................................... 651
   Nicole E. Collison and Stan E. Dosso
1pUW12 A modified grid method for matched-field localization ................... 653
   Ling Xiao, Renhe Zhang, and Lianghao Guo

1pPLb PLENARY LECTURE

1pPLb1 Adapted waveform analysis, A tool for audio processing and enhancement .... 655
   Ronald R. Coifman

VOLUME II

2aPLa PLENARY LECTURE

2aPLa1 Non-invasive ultrasonic surgery .......................................................... 659
   Gail ter Haar

2aAAa SOUND FIELD FOR SINGERS AND ORCHESTRA, PART 2

2aAAa1 Individual preference on the delay time of a single reflection for cellists ...... 663
   Shin-ichi Sato, Saho Ota, and Yoichi Ando
2aAAa2 A study of improvements to acoustical conditions for singer ................... 665
   Dennis Noson
2aAAa3 Some recent experiences with the acoustical design of orchestra pits .......... 667
   Kurt Graffy, Larry Tedford, and Dennis Paoletti
2aAAa4 The virtual orchestra: Creative issues ............................................. 669
   Frederick W. Bianchi and Richard H. Campbell
2aAAa5 The virtual orchestra: Acoustical and audio engineering issues .............. 671
   Richard H. Campbell and Frederick W. Bianchi
2aAAa6 The effect of early reflection on players in concert hall ...................... 673
   Kanako Ueno, Fumiaki Satoh, Hideki Tachibana, Takahiko Ono, and Mariko Senju

2aAAb SOUND FIELD FOR THE AUDIENCE, PART 2

2aAAb1 Boxes and sound quality in an Italian opera house ............................. 675
   Alessandro Cocchi, Massimo Garai, and Carla Tavernelli
2aAAb2 Measurements of the sound energy polarization at some locations inside an Italian opera house .................................................. 677
   Domenico Stanzial, Davide Bonsi, and Nicola Prodi
2aAAb3 Measurements in opera houses: Comparison between different techniques and equipment ................................................................. 679
   Patrizio Fausti, Angelo Farina, and Roberto Pompoli
2aAAb4 Individual subjective preference of listeners for vocal music sources in relation to the subsequent reverberation time of sound fields ...................... 681
   Hiroyuki Sakai, Hiroshi Setoguchi, and Yoichi Ando

2aPP5 Variations of the leaky-integrator model and validation with detection of sinusoidal and percentage duty-cycle modulated noise .......................................................... 833
John A. Nelson and Ruth A. Bentler

2aPP6 Comodulation masking release with tone pips added out of phase to the valleys of a sinusoidally amplitude modulated pure tone ......................................................... 835
Deborah A. Fantini, Roel Delahaye, and Ray Meddis

2aPP7 Comodulation masking release: The effect of the characteristics of noisebands presented before and after a signal ............................................................... 837
Lee Mendoza, Joseph W. Hall, III, and John H. Grose

2aPP8 Perception of roughness in harmonic multitones ...................................................... 839
Andrzej B. Dobrucki and Maury C. Kin

2aPP9 A model of auditory image flow I: Architecture ....................................................... 841
N. P. McAngus Todd

2aPP10 A model of auditory image flow II: Detection of amplitude and frequency modulation ............................................................... 843
N. P. McAngus Todd and Duncan R. Brown

2aPP11 Role of pinna cavities in median plane localization .................................................. 845
Kazuhiro Iida, Motoki Yairi, and Masayuki Morimoto

2aPP12 The influence of different speech segments on spatial localization ............................. 847
Brian L. Karlsen

2aPP13 Underwater sound localization: Role of interaural differences .................................. 849
Pierre Bovet, Carolyn Drake, François Bernaschina, and Sophie Savel

2aPP14 A new model for binaural signal detection ............................................................. 851
Jeroen Breebaart, Steven van de Par, and Armin Kohlrausch

2aPP15 Further evidence for the influence of peripheral compression on binaural detection .... 853
Steven van de Par and Armin Kohlrausch
2aPP16 Model of auditory localization using neural networks ........................................ 855
Scott K. Isabelle, James A. Janko, and Robert H. Gilkey

2aPP17 On the difference between absolute and relative auditory distance perception .......... 857
Hae-Young Kim, Yōiti Suzuki, Shouichi Takane, Kenji Ozawa, and Toshio Sone

2aPP18 Auditory motion aftereffects with a two-tone adapter ........................................ 859
Hisashi Uematsu and Makio Kashino

2aPP19 Echolocation by moving and stationary listeners ................................................ 861
Michael S. Gordon, Lawrence D. Rosenblum, and Luis Jarquin

2aPP20 Reflectance measurements of the acoustic reflex input-output function .................. 863
M. Patrick Feeney and Douglas H. Keefe

2aPP21 Vibration measurement of the tympanic membrane using the time-averaged speckle pattern interferometry ................................................................. 865
Hiroshi Wada, Masataka Takeuchi, Koji Hozawa, Takashi Gemma, and Makoto Nara

2aPP22 Filter shapes for brief signals as a function of preceding stimulation ...................... 867
Elizabeth A. Strickland

2aPP23 Variable-duration notched-noise experiments in a noise context ............................ 869
James J. Hant, Brian P. Strope, and Abeer A. Alwan

2aPP24 Comparison of psychophysical and neural thresholds in response to electrical stimulation of the cochlea in guinea pigs ......................................................... 871
Bryan E. Pfingst, Lisa M. Montney, and Sanford C. Bledsoe

2aPP25 Physiological correlates of the “mean-term” auditory adaptation .............................. 873
Nikolay G. Bibikov and Oxana N. Grubnik

2aPP26 Mechanisms underlying recovery from forward masking in electrical stimulation .... 875
Monita Chatterjee

2aPP27 Neurophysiological and psychophysical measures of duration discrimination in normal-hearing adults and adults with cochlear implants ......................................... 877
Patricia G. Trautwein, Curtis W. Ponton, Betty Kwong, and Michael D. Waring

2aPP28 Spectro-temporal influence on auditory cortical evoked potential thresholds ............. 879
Ann Clock Eddins

2aPP29 Psychometric functions for gap detection ............................................................... 881
Mary Florentine, Søren Buus, and Wei Geng

2aPP30 Suppression and the upward spread of masking .................................................... 883
Andrew J. Oxenham and Christopher J. Plack

2aPP31 Intensity discrimination of ramped and damped tones ......................................... 885
Robert S. Schlauch, Dennis T. Ries, Jeffrey J. DiGiovanni, Sarah Elliott, and Shari Campbell

2aPP32 Preferential detection of rising versus falling intensity .......................................... 887
John G. Neuhoff and Jennifer S. Wess

2aPP33 The detection of differences in rate of frequency change in gliding tones .................. 889
John P. Madden and John G. Pierce

2aPP34 Contribution to the study of the audiometrical scores sources of variation ................. 891
Marielle Bruyninckx, Sáïda Hamache, and Bernard Harmegnies

2aPP35 Hawkins and Stevens revisited at low frequencies .............................................. 893
Andrianus J. M. Houtsma

2aPP36 The perception of three tone patterns by Indian and American listeners .................. 895
Nandini Iyer, Evelyn M. Hoglund, and Mari R. Jones

2aPP37 Tempo perception is limited by a short temporal window ..................................... 897
Nathalie Panissal-Vieu and Carolyn Drake

2aPP38 Investigations and analysis of assessment words for sound quality for the reproduction of high order sensations ................................................................. 899
Tomoharu Ishikawa, Shingo Fuyuki, and Makoto Miyahara

2aPP39 Factor analysis of the perception of the evaluation of environmental sounds using adjectives describing sound quality, emotional state, and information carried by sounds .............................................. 901
Toshio Sone, Koji Abe, Kenji Ozawa, and Yōiti Suzuki

2aPP40 Sound quality estimation using human hearing sensation .................................... 903
Dong-Chul Chung, Soon-Hyob Kim, and Wan-Sup Cheung
2aPP41 Analysis of annoyance of low-frequency beat inside a vehicle .......................... 905  
K. Genuit and J. Poggenburg

2aPP42 Spectrum contrast and noise annoyance .......................................................... 907  
Anna Preis

2aPP43 Detection and discrimination of amplitude-modulated signals in noise ........................................ 909  
King Chung, Fan-Gang Zeng, and Beverly A. Wright

2aSA NEW CHALLENGES IN STRUCTURAL ACOUSTICS

2aSA1 Structural acoustics of consumer products .......................................................... 911  
Richard H. Lyon

2aSA2 Wind noise challenge in automobile industry ...................................................... 913

2pSC PROSODY, PRODUCTION, AND VOICE

2pSC1 The domain of phrase-final lengthening in English ........................................ 1235
Stefanie Shattuck-Hufnagel and Alice Turk

2pSC2 Ambiguity in prominence perception in spoken utterances of American English ........ 1237
L. C. Dilley and S. Shattuck-Hufnagel

2pSC3 Intonation of noun phrases in Unangan (Eastern Aleut) .................................... 1239
Alice Taff and Jacob Wegelin

2pSC4 Vowel devoicing and the loss of lexical accent in Tokyo Japanese .......................... 1241
Mafuyu Kitahara

2pSC5 The effect of stress on vowel length in Aleut ............................................... 1243
Lorna Rozelle

2pSC6 Temporal structuring of acoustic segments in speech communication ...................... 1245
Rodmonga K. Potapova

2pSC7 Influence of functional and acoustic parameters of intonation contours on prosody lateralization ................................................................. 1247
Marc D. Pell

2pSC8 Syntactic ambiguities and their resolution in prosody: Observations in Japanese, Korean, Mongolian and Turkish ...................................................... 1249
Young-Sook Choi and Shigeru Sato

2pSC9 The effects of discourse focus and lexical accent on $F_0$ in Japanese ...................... 1251
Young-Sook Choi and Shigeru Sato

2pSC10 Effects of prosodic structure and speech rate on consonant weakening .................... 1253
Lisa M. Lavoie

2pSC11 Intergestural coordination adjacent to multiple prosodic boundaries ....................... 1255
Dani Byrd

2pSC12 Non-traditional acoustic features of focus .................................................... 1257
H. Timothy Bunnell, Steven R. Hoskins, and Debra M. Yarrington

2pSC13 Baby-word rhythm preferences of Japanese infants ........................................... 1259
Akiiko Hayashi, Kyoko Yoshioka, and Reiko Mazuka

2pSC14 The relationship between spectral properties and perceptual evaluation of hypernasality in children with cleft palate—vowel /i/ ........................................ 1261

2pSC15 Effects of levodopa on finger and articulatory movements in Parkinson’s disease .......... 1263
Michele Gentil, Claire-Lise Tournier, and Pierre Pollak

2pSC16 Stop-consonant production by dysarthric speakers: Use of models to interpret acoustic data ................................................................. 1265
Kelly L. Poort

2pSC17 Formant trajectory characteristics in persons with Parkinson, cerebellar, and upper motor neuron disease ................................................................. 1267
Gary Weismer and Jill Wildermuth

2pSC18 The effects of utterance length on temporal control in aphasia ............................. 1269
Shari R. Baum

2pSC19 Source modeling of severely pathological voices .............................................. 1271
Bruce R. Gerratt, Jody Kreiman, Norma Antonanzas-Barroso, Brian Gabelman, and Abeer Alwan

2pSC20 Speaking rate-induced acoustic variability in Parkinson’s disease ......................... 1273
Kris Tjaden, Sylvia Farrens, Kathryn Geaney, Paul McRae, and Jean Nachtman

2pSC21 A comparative study of speech motor programming in stutterers and non-stutterers ................................................................. 1275
N. Aravind and S. R. Savithri
2pSC22  Modeling of articulatory dynamics using cascaded first-order systems .......................... 1277
   Yorinobu Sonoda and Kohichi Ogata
2pSC23  Testing a normalization procedure for articulatory recovery ........................................ 1279
   Richard S. McGowan
2pSC24  A task-dynamic approach to gestural anticipation in speech: A hybrid recurrent
   network .......................................................................................................................... 1281
   Elliot Saltzman and Suvo Brata Mitra
2pSC25  An interactive construction system of 3-D vocal tract shapes from tomograms ............ 1283
   Tohru Yokoyama, Nobuhiro Miki, and Yoshihiko Ogawa
2pSC26  Palate shape effects on characteristic vowel tongue postures ........................................ 1285
   Mark K. Tiede
2pSC27  Characteristics of phonation offset and onset in normal adults and children ............ 1287
   Laura L. Koenig
2pSC28  Speaker identification using noncontemporary speech samples ................................. 1289
   Harry Hollien and Reva Schwartz
2pSC29  Perception of intoxication effects on speech ............................................................... 1291
   Harry Hollien and Gea De Jong
2pSC30  Perceptually-motivated modeling of noise in pathological voices ................................. 1293
   Brian Gabelman, Jody Kreiman, Bruce R. Gerratt, Norma Antonanzas-Barroso, and Abeer Alwan
2pSC31  A perceptual and acoustic study of the imitated voice .................................................. 1295
   Kirk P. H. Sullivan and Frank Schlichting
2pSC32  Acoustic analysis of the effects of alcohol on the human voice ....................................... 1297
   Orla M. Cooney, Kevin G. McGuigan, Peter J. P. Murphy, and Ronán M. Conroy
2pSC33  The use of random spliced speech for the recognition of familiar voices ..................... 1299
   Ricardo M. de Figueiredo

2pSPa MULTICHANNEL SIGNAL PROCESSING FOR ACOUSTICAL APPLICATIONS

2pSPa1  Reconstruction and projection of interior sound fields using a spherical
   measurement array .......................................................................................................... 1301
   Earl G. Williams
2pSPa2  Multichannel acoustical measurement for sound field mapping ...................................... 1303
   Svend Gade and Jørgen Hald
2pSPa3  Signal processing for sound capture .............................................................................. 1305

2pSPa6  Imaging of supersonic surface fields on a cylindrical shell ............................................ 1311
   Charles N. Corrado, Jr., Daniel T. DiPerma, and Matthew Conti
2pSPa7  Holographic reconstruction of active sources in three-dimensional enclosure ............... 1313
   Young-Key Kim, Yang-Hann Kim, Byeongsik Ko, and Kangho Ko
2pSPa8  Estimation of farfield pressures from geometric nearfield measurements ....................... 1315
   Daniel T. DiPerma, Charles N. Corrado, Jr., and David C. Warwick
2pSPa9  Feasibility of using imperfect microphone arrays in noise source location .................... 1317
   Tarun Bhatt, Corinne M. Darvennes, and J. Richard Houghton
2pSPa10  Super directivity design for a sphere-buffed microphone array ....................................... 1319
   Kazuhiko Kawahara and Kimitoshi Fukudome
2pSPa11  Beamforming for broadband constant beamwidth through FIR and DSP
   implementation .................................................................................................................. 1321
   Yuanliang Ma, Baosong Zhang, Wei Ding, and Huigang Wang
2pSPb IMPLEMENTATION ISSUES OF ACOUSTICAL SIGNAL PROCESSING IN REAL TIME SYSTEMS II

2pSPb1 FFT beamforming with cylindrical arrays: Application to the toroidal volume search sonar
Timothy C. Gallaudet and Christian P. de Moustier

2pSPb2 Acoustic source estimation based on physical modeling and optimization algorithm
A. J. Amditis, K. S. Nikita, and N. K. Uzunoglu

2pSPb3 Kalman based time varying DOA estimation robust to impulsive noise
Han-Su Kim and Koeng-Mo Sung

2pSPb4 An universal parallel sonar signal processing system
Lifu You, Enfang Sang, and Jingyi Zhao

2pSPb5 Maximum likelihood track-before-detect matched-field beamforming with SWellEx data
Kerem Harmancı, Joseph Tabrikian, and Jeffrey L. Krolik

2pUW SCATTERING AND REVERBERATION

2pUW1 The effects of bandwidth, dispersion and correlation length scale on shallow water reverberation
Kevin D. LePage

2pUW2 High frequency acoustic scattering from thermally generated turbulence
John Oeschger

2pUW3 Range spread measurement of underwater scatterers and channels using active sonar probing signals and a cross correlation process
James J. Kisenwether and Dennis W. Ricker

2pUW4 Target size measurements via specular echo spectrum
Jérôme Mathieu, Patrick Schweitzer, Etienne Tisserand, Serge Weber, and Serge Gauthier

2pUW5 The extraction of a target scattering response from measurements made in a range-dependent shallow water environment
Angie Sarkissian

2pUW6 Formalism for boundary scattering in waveguides
David H. Berman

2pUW7 Backscattering by layered media: Modeling and comparison with data
Laurent Guillou and Xavier Lurton

2pUW8 Measurement at 50–150 kHz of absorption due to suspended particulate matter
Niven R. Brown, Timothy G. Leighton, Simon D. Richards, and Anthony D. Heathershaw

2pUW9 Turbidity in future high frequency sonar performance models
Simon D. Richards, Niven R. Brown and Timothy G. Leighton

2pUW10 Spectral diffusion of seismo-acoustic waves in shallow water
Robert I. Odom and Valerie I. Peyton

2pUW11 Experimental verification of the deformed cylinder scattering model and its application to the calculation of backscattering from fish
Kouichi Sawada, Zhen Ye, and Masahiko Furusawa

2pUW12 Comparison between subcritical penetration models and in situ data
Alain Maguer, Edoardo Bovio, Warren Fox, Eric Pouliquen, and Henrik Schmidt

2pUW13 Subcritical penetration into a viscoelastic solid due to interface roughness—Laboratory experiment and perturbation theory model
Garfield R. Mellema, Terry E. Ewart, and Kevin L. Williams

2pUW14 Aspects of a damped surface wave in the Fourier diamond spaces. New surface wave analysis methods (S.W.A.M.)
Loïc Martinez, Jean Duclos, and Alain Tinel

2pUW15 Aspects of cylindrical shell resonances in the Fourier diamond spaces. Use of surface wave analysis methods (S.W.A.M.) on experimental or numerical data
Loïc Martinez, Jean Duclos, and Alain Tinel

B33
2pUW16  New experimental characterization of a resonance: Identification of the mode number using the Argand diagram and the GTD approach ........................... 1363
        Serge Derible, Jean-Marc Conoir, Jean-Louis Izbicki, and Pascal Rembert
2pUW17  Scholte wave dispersion by rippled liquid/solid interface topography ............... 1365
        Jacques R. Chamuel
2pUW18  Scatterer depth estimation using broadband active matched field processing .... 1367
        Brian K. Jennison, C. Allan Boyles, and Kevin J. McCann
2pUW19  The detection of cylindrical objects of low acoustic contrast buried in the seabed ... 1369
        Ruthven C. Evans and Timothy G. Leighton
2pUW20  Characteristics of semi-buried object in shallow water ................................ 1371
        Shi-e Yang and Xiu-kun Li

2pPLb  PLENARY LECTURE

2pPLb1  Representation of complex stimuli in the peripheral auditory system ............... 1373
        Eric D. Young, Barbara M. Calhoun, Jane J. Yu, and Israel Nelken

3aPLa  PLENARY LECTURE

3aPLa1  How listeners find the right words ............................................................ 1377
        Anne Cutler

3aAAa  STRUCTURE-BORNE SOUND IN BUILDINGS:  
        MEASURING AND MODELING NOISE FLANKING TRANSMISSION

3aAAa1  Sound transmission through permeable double-leaf membranes .................... 1381
        Kimihiro Sakagami, Masakazu Kiyama, Toru Uyama, and Masayuki Morimoto
3aAAa2  Prediction of noise transmission through commercial profiled metal cladding 
        systems ................................................................. 1383
        Y. W. Lam
3aAAa3  European prediction models for building acoustics .................................. 1385
        Eddy Gerretsen
3aAAa4  Structure-borne transmission in lightweight buildings .......................... 1387
        Robert J. M. Craik
3aAAa5  Flanking paths between wood frame walls and floors using statistical energy 
        analysis ........................................................................ 1389
        T. R. T. Nightingale and John A. Steel
3aAAa6  The use of semi-analytical calculation models to verify SEA predictions of flanking 
        transmission in building structures .................................. 1391
        Ivan Bosmans and Gerrit Vermeir

3aAAb  IMPACT OF TRAINS ON PERFORMANCE HALLS

3aAAb1  Owner/builder perspective of the impact of trains on performance halls for 
        Benaroya Hall, Seattle, Washington ............................................ 1393
        Andrew Clapham
3aAAb2  Vibration isolation design for Benaroya Hall ........................................... 1395
        George Paul Wilson
3aAAb3  Structural design for vibration isolation at Benaroya Hall ........................ 1397
        Brian H. Glover
3aAAb4  Controlling subway noise in LG Arts Center—Sangnam Hall ...................... 1399
        Ahmad K. Abdehrazzaq and D. Stanton Korista
3aAAb5  Train and rail transit noise in cinemas and theatres: Case studies .............. 1401
        M. Asselineau
3aAB GENERAL ANIMAL BIOACOUSTICS

3aAB1 Three-dimensional computer modeling of biosonar emission in the common dolphin ................................................................. 1403
James L. Aroyan

3aAB2 Acoustic pathways of hearing in the bottlenose dolphin, *Tursiops truncatus* ................................................................. 1405
Whitlow W. L. Au, Bertel Mohl, Paul E. Nachtigall, Jeffrey Pawloski,
and James Aroyan

3aAB3 Effects of low frequency seismic exploration sounds on the distribution of cetaceans in the Northern Gulf of Mexico .................................................. 1407
Shannon Rankin and William E. Evans

3aAB4 An onboard acoustic data logger to record biosonar of free-ranging bottlenose dolphins ......................................................................................... 1409
Douglas P. Nowacek, Peter L. Tyack, Randall S. Wells, and Mark P. Johnson

3aAB5 Results of underwater ambient noise measurements in three large tank exhibits at the Monterey Bay Aquarium .................................................. 1411
Daniel Matthew O’Neal and Steven R. Baker

3aAB6 Identification of dolphin schools by bio-acoustical unique features ................................................................. 1413
Konstantin Kebkal, Rudolf Bannasch, and Valery Kulagin

3aAB7 Matched field processing of blue whale vocalizations using calibrated environmental models .................................................. 1415
Aaron M. Thode, Gerald L. D’Spain, and William A. Kuperman

3aAB8 Feasibility of monitoring bowhead whales with a vertical line array ................................................................. 1417
Kevin D. Heaney and Peter N. Mikhalevsky

3aAB9 Observations of the movements of humpback whales about an operating seismic survey vessel near Exmouth, Western Australia .................. 1419
Robert D. McCauley, Micheline-Nicole Jenner, Curt Jenner, and Douglas H. Cato

3aAO ACOUSTIC DETERMINATION OF OCEAN PARAMETERS

3aAO1 Applications of two frequency insonification techniques to oceanic bubble sizing .................................................. 1421
Andy D. Phelps, Matt D. Simpson, and Timothy G. Leighton

3aAO2 Possibilities for small-scale emission tomography of bubble plumes in shallow water .................................................. 1423
Ivan P. Smirnov, Jerald W. Caruthers, Paul Elmore, and Alexander I. Khil’ko

3aAO3 Monitoring air-sea exchange using ambient sound ................................................................. 1425
Jeffrey A. Nystuen

3aAO4 Acoustic wave scattering and propagation in bubbly liquids ................................................................. 1427
Zhen Ye and Alberto Alvarez

3aAO5 Rough surfaces characterization using a time-reversal mirror ................................................................. 1429
Philippe Roux, Julien de Rosny, Mathias Fink, and James H. Rose

3aAO6 The Aharonov-Bohm effect revisited by an acoustic time-reversal mirror ................................................................. 1431
Philippe Roux, Julien de Rosny, and Mathias Fink

3aAO7 Real time characterization of unstationary flows using a time reversal mirror ................................................................. 1433
Philippe Roux, Agnès Maurel, Julien De Rosny, Sébastien Manneville, and Mathias Fink

3aAO8 Results from cross-correlation measurement of estuarine current velocity ................................................................. 1435
Roger W. Bland and Daniel G. Neuman

VOLUME III

3aBV ULTRASOUND ASSISTED DRUG DELIVERY I

3aBV1 Mechanisms for biological effects of ultrasound ................................................................. 1437
Edwin L. Carstensen
Toxin and gene transfer into cells by extracorporeal shock waves: in vitro and in vivo effects .......................... 1439
Michael Delius and Ulrich Lauer

Ultrasound induced transcutaneous transport for drug delivery and diagnostics .......... 1441
Joseph Kost, Samir Mitragotri, and Robert Langer

Ultrasound for the mediation of a therapeutic agent through the blood-brain barrier ........................................... 1443
Leonard J. Bond and Lawrence Ka-yun Ng

Mechanistic studies of ultrasonically-enhanced transdermal drug delivery ................. 1445

Enhancement of ultrasound mediated transfection with cavitation micronuclei ............ 1447
James F. Greenleaf, William J. Greenleaf, Randy Kinnick, Gobinda Sarkar, and Mark A. Bolander

Defects of biolayers generated by ultrasound .................................................. 1449
M. S. Malghani, Jie Yang, and Junru Wu

Selected topics in electroacoustical calibrations, measurements and standards .......... 1451
Victor Nedzelniitsky

Progress in silicon microphones ........................................................................... 1453
Gerhard M. Sessler

Design and properties of face to face coupler for microphone comparison calibration .................................................. 1455
Erling Frederiksen and Jørgen I. Christensen

Controlled environment for reciprocity calibration of condenser microphones .......... 1457
George S. K. Wong and Lixue Wu

Procedures for the precision of sound power determination by S. I. scanning method .................................................. 1459
Hideki Tachibana and Hideo Suzuki

Experimental study on the accuracy of sound power determination of S. I. scanning method .................................................. 1461
Hiroo Yano, Hideki Tachibana, and Hideo Suzuki

Electroacoustics and standards: Microphones for sound level measurements .......... 1463
Gunnar Rasmussen

A study of long-term sensitivity changes in backplate of electret type condenser microphones .................................................. 1465
Kenzo Miura and Yoshinobu Yasuno

Measurement of microphone random-incidence and pressure-field responses and determination of their uncertainties .................................................. 1467
Johan Gramtorp and Erling Frederiksen

Measuring system for the derivation of thermal loudspeaker parameters ................. 1469
G. K. Behler and A. Bernhard

Studies in bowing point friction in bowed strings .................................................. 1471
Robert T. Schumacher

Modal analysis of violins and cellos ........................................................................... 1473
Thomas D. Rossing, Mark Roberts, Eric Bynum, and Laura Nickerson

A normal-mode-based model of violin radiation .................................................. 1475
George Bissinger

Influence of the weight of mutes on tones of a violin family .................................. 1477
Kenshi Kishi

Anomalous low frequencies from a bowed violin string ........................................ 1479
Roger J. Hanson and Frederick W. Halgedahl
Acoustical aspects of chamber music for strings .................................. 1481
Juergen Meyer

Radiation mechanisms of a violin with known modal characteristics ........ 1483
Lily M. Wang and Courtney B. Burroughs

Behavior of real violin strings, mechanically bowed ................................ 1485
Norman C. Pickering and Michael P. Kerr

3aNSa LOW-FREQUENCY NOISE

A new way of reducing self-sustained flow noise .................................. 1487
Rene Henry, Anas Sakout, Alex Coiret, and Aziz Hamdouni

A new approach to low frequency room noise criteria ............................. 1489
Robert D. Hellweg, Jr and Hsien-sheng (Jason) Pei

Parameters involved in low frequency noise annoyance .......................... 1491
Ulf Landstrom

The effects of age on annoyance caused by low frequency noise ............... 1493
Bridget M. Shield and Rukhsana Adam

3aNSb TIRE NOISE

The investigation of a towed trailer test for passenger tire coast-by noise measurement ................................................................. 1495
James K. Thompson and Thomas A. Williams

Assessment of tire/pavement interaction noise under vehicle passby test conditions using sound intensity measurement methods ................ 1497
Paul R. Donavan, Richard F. Schumacher, and Jeffrey R. Stott

The influence of belt and tread band stiffness on the tyre noise generation mechanisms ................................................................. 1499

### 3aPAa SONOCHEMISTRY AND SONOLUMINESCENCE: SC I

| 3aPAa1 | Under which conditions is sonochemistry able to give information about the so-called extreme conditions prevailing inside the collapsing bubbles? | 1531 |
|        | Jacques Reisse, Kristin Bartik, and Nicolas Segebarth          |      |
| 3aPAa2 | Sonochemical preparation of protein microspheres                | 1533 |
|        | Kenneth S. Suslick                                            |      |
| 3aPAa3 | Sonochemistry of aqueous solutions: EPR and spin trapping studies of radical intermediates | 1535 |
|        | Peter Riesz and Vladimir Mišik                                |      |
| 3aPAa4 | Sonochemistry and sonoluminescence in aqueous solutions containing surface active solutes | 1537 |
|        | Franz Grieser, Muthupandian Ashokkumar, Rachel A. Caruso, Katrina Barbour, and Paul Mulvanevy |      |
| 3aPAa5 | Sonochemical reactor optimization using computational acoustics techniques | 1539 |
|        | Jean-Louis Y. Migeot                                          |      |
| 3aPAa6 | Sonochemistry—A demonstration lecture                         | 1541 |
|        | Timothy J. Mason                                              |      |
| 3aPAa7 | The effects of organic compound doping in single-bubble sonoluminescence | 1543 |
|        | Muthupandian Ashokkumar, Franz Grieser, William B. McNamara III, Kenneth S. Suslick, Thomas J. Matula, C. Allen Frensley, and Lawrence A. Crum |      |
| 3aPAa8 | An interpretation of the MBSL temperatures deduced from metal atom emission | 1545 |
|        | Lawrence S. Bernstein                                         |      |

### 3aPAb NONLINEAR ACOUSTICS I: 1. HISTORY; 2. SOLIDS, ROCKS; 3. SURFACE WAVES, PART 1

| 3aPAb1 | Development of solid state nonlinearity                        | 1547 |
|        | M. A. Breazeale                                                |      |
| 3aPAb2 | Acoustic nonlinearities in earth solids                        | 1549 |
|        | Lev A. Ostrovsky and Paul A. Johnson                           |      |
| 3aPAb3 | Model equations for nonlinear surface waves                    | 1551 |
|        | M. F. Hamilton, Yu. A. Il’inskii, and E. A. Zabolotskaya       |      |
| 3aPAb4 | Principles and applications of nonlinear acoustic nondestructive testing | 1553 |
|        | Alexander Sutin and Dimitri M. Donskoy                        |      |
| 3aPAb5 | Measurements of surface-wave harmonic generation in nonpiezoelectric materials | 1555 |
|        | D. C. Hurley                                                   |      |
| 3aPAb6 | Pulsed nonlinear surface acoustic waves in crystals            | 1557 |
| 3aPAb7 | Rayleigh wave solitons in layered media                        | 1559 |
|        | Robert I. Odom                                                 |      |
Nondestructive flaw detection in a solid material using nonlinear acoustic responses
C. M. Song, K. I. Jung, and S. W. Yoon

Slow nonlinear dynamics in rock
R. A. Guyer, K. R. McCall, and K. E.-A. Van Den Abeele

Slow dynamics and nonlinear response at low strains in Berea sandstone
James A. TenCate and Thomas J. Shankland

3aPP AUDITORY ATTENTION I

Divided attention to simultaneous stimulation
Ervin R. Hafter, Anne-Marie Bonnel, and Erick Gallun

Crossmodal links between auditory and visual attention
Charles Spence and Jon Driver

Auditory objects of attention
C. J. Darwin and R. W. Hukin

Perceiving talking faces: Insights into auditory attention
Dominic W. Massaro

Electrophysiological studies of auditory spatial attention
Steven A. Hillyard and Wolfgang Teder-Salejarvi

3aSA DAMPING AND ABSORPTION

An algorithm for calculation of material loss factors using single degree of freedom method and digital data measured by FFT analyzer
Toshiyuki Maeda

Dynamic and acoustic properties of beams of composite material
Shiva Sander Tavallaey

Acoustic spectropic determination of dynamic elastic moduli and internal friction coefficient
Qiushuang Guo and David A. Brown

Numerical method using filter banks for vibroacoustic analysis in the medium frequency range
S. Gorog and P. Micheau

Improvement of damping via analysis of viscoelastic composites
Ibrahima Sow, Jean Nicolas, Toan Vu-Khanh, and Olivier Beslin

Vibration damping characteristics of the concrete material included easy moving particles
Noboru Ishikawa and Hidemaro Shimoda

Finite-element modelling of the vibro-acoustical behavior of poro-elastic materials
Hamid Bouhioui and Murray Hodgson

Numerical analysis of damping added by a foam layer on a vibrating plate
Nicolas Dauchez, Souhi Sabraoui, and Noureddine Atalla

On the use of assumed spatial distributions for the vibration analysis of built-up plate structures
R. A. Fulford and B. A. T. Petersson

Statistical analysis of boundary sound absorption in a panel-cavity system
K. S. Sum and J. Pan

Sound transmission through multilayer structures with isotropic elastic porous materials
Noureddine Atalla, Raymond Panneton, and Patricia Debergue

3aSC LANGUAGE SPECIFIC INFLUENCES DURING INFANCY

Bilingual exposure and some consequences on native-language recognition processes at four months
Laura Bosch
3aSC2 Effects of language experience on speech perception ................................. 1601
Patricia K. Kuhl

3aSC3 Vowel perception in the first year of life ....................................................... 1603
Linda Polka and Ocke-Schwen Bohn

3aSC4 Developing sensitivity to native language sound patterns .......................... 1605
Peter W. Jusczyk

3aSC5 Updates on becoming a native listener ......................................................... 1607
Janet F. Werker, Judith E. Pegg, Rushen Shi, and Christine Stager

3aSC6 Rapid gains in the speed and efficiency of word recognition by infants in the second year ............................................................. 1609
Anne Fernald, Daniel Swingley, and John P. Pinto

3aUW BOTTOM GEOACOUSTIC CHARACTERIZATION AND INVERSION I

3aUW1 Measuring parameters that control acoustic propagation in granular sediments near the sea floor ................................................................. 1611
Robert D. Stoll

3aUW2 Matched-field inversion in a range-dependent waveguide .......................... 1613
Martin Musil, John M. Ozard, and Michael J. Wilmut

3aUW3 Numerical analysis on inversed bottom geoacoustic models for prediction of shallow-water acoustic field ................................................. 1615
Jin Guoliang and Zhang Renhe

3aUW4 A multi-frequency inversion method for geoacoustic parameters .............. 1617
Renhe Zhang, Fenghua Li, and Wenyu Luo

3aUW5 Geoaoustic parameter inversion from waveform structure ......................... 1619
Fenghua Li and Renhe Zhang

3aUW6 Geophysical measurements on marine sediment cores and geo acoustic modelling ................................................................. 1621
Philip P. Thomson, John I. Dunlop, and Frank Neissen

3aUW7 Verification of a library for categorizing bottom substrate type .................. 1623
John Hedgepeth, Colleen Sullivan, Robert Sullivan, and Patrick Schneider

3aUW8 A measuring method for shear wave velocity of marine sediment using radiation impedance .......................................................... 1625
Masao Kimura

3aUW9 Measurements of high-frequency acoustic scattering from seabed vegetation ................................................................. 1627
Anthony P. Lyons and Eric Pouliquen

3aUW10 Use of Scholte waves to determine the shear wave velocity structure in marine sediments ................................................................. 1629
Sayuri Kawashima and Masao Kimura

3aUW11 Simplex simulated annealing: A hybrid approach to geoacoustic inversion 1631
Mark R. Fallat and Stan E. Dosso

3aUW12 Physical parameter uncertainty effect on frequency dependent acoustic response in ocean sediment ................................................................. 1633
Yongke Mu, Mohsen Badiey, and Alexander H-D. Cheng

3aUW13 Inversion of explosive shallow water transmission loss data to obtain acoustic seabed models ................................................................. 1635
Marshall V. Hall

3aUW14 The development of the multibeam echosounder: A historical account .......... 1637
Ståle Vilming

3aUW15 A comparison of Hankel transform algorithms’ performance for use in shallow water applications ................................................................. 1639
Ben Cox and Philip Joseph

3aUW16 Comparison of the performances of global optimization methods with perturbative methods in the estimation of ocean bottom properties from multi-frequency data 1641
Subramaniam D. Rajan

3aUW17 Performance evaluation of horizontal and vertical vector sensor arrays in shallow water environments ................................................................. 1643
Peter Gerstoft and Joo Thiam Goh
3aUW18  Range-dependent environmental mismatch in matched field tomography .................. 1645
       Ronald T. Kessel
3aUW19  Application of coordinate rotation to inversion for sediment parameters ............... 1647
       John S. Perkins, Michael D. Collins, and Laurie T. Fialkowski
3aUW20  Offshore geoacoustic inversions using sounds from land vehicle activity .................. 1649
       G. L. D'Spain, L. P. Berger, W. A. Kuperman, and W. S. Hodgkiss
3aUW21  The multiple scattering interactions of cobbles and pebbles lying on the ocean floor .... 1651
       C. Feuillade and R. W. Meredith

3aPLb PLENARY LECTURE

3aPLb1  Stochastic effects in ocean acoustics. Advances in theory and experiment .................. 1653
        B. J. Uscinski

3pPL PLENARY LECTURE

3pPL1  Marine mammal ears: An anatomical perspective on underwater hearing .................. 1657
        Darlene R. Ketten

3pAA VERN O. KNUDSEN DISTINGUISHED LECTURE

3pAA1  Concert hall research: Balancing complexity with practicality ............................ 1661
        J. S. Bradley

3pAO ACOUSTICS OF FISHERIES AND PLANKTON I

3pAO1  An intermediate range sonar for fish detection ................................................. 1663
        David M. Farmer, Mark V. Trevorrow, and Bjarke Pedersen
3pAO2  Shallow water salmon and herring detection using 100 kHz sidescan sonars .............. 1665
        Mark V. Trevorrow, David M. Farmer, and Bjarke Pedersen
3pAO3  Multi-beams sonar image processing and three dimensional analysis of fish schools .... 1667
        Chafiaa ˆ Hamitouche, Vale ´ rie Burdin, Carla Scalabrin, and Laurent Lecornu
3pAO4  Near-resonance scattering from schooling fish ................................................ 1669
3pAO5  Sound scattering from a few scatterers: Application to swimbladder fish .................. 1671
        Alberto Alvare Zealand and Zhen Ye

3pBV ULTRASOUND ASSISTED DRUG DELIVERY II

3pBV1  Chemopotentiation by low-level ultrasound ...................................................... 1673
        George H. Harrison and Elizabeth K. Balcer-Kubiczek
3pBV2  Sonochemistry of sonodynamic therapy ............................................................. 1675
        Peter Riesz and Vladimir Mišik
3pBV3  Gene activation and gene delivery with ultrasound .......................................... 1677
        Evan C. Unger, Thomas P. McCleery, Robert H. Sweitzer, Vernoica E. Caldwell,
        and Annmarie Santanen
3pBV4  Ultrasound activation of new drugs for killing cancer cells ................................. 1679
        Katsuro Tachibana and Toshiki Uchida
3pBV5  Control of ultrasound-mediated reversible membrane permeabilization for targeted
        drug delivery ................................................................. 1681
        Mark R. Prausnitz, Keyvan Keyhani, Aimee Parsons, and Thomas N. Lewis

B41
3pEA ADVANCED TRANSDUCTION MATERIALS

3pEA1 Efficiency and electromechanical resonance in magnetostrictive transducers .......... Frederick T. Calkins and Alison B. Flatou 1683
3pEA2 A study of 1-3 piezocomposite high drive limits ............................................. Thomas R. Howarth, David Van Tol, Charles Allen, and W. Jack Hughes 1685
3pEA3 The development of affordable constant beamwidth transducers using injection molded 1-3 piezoelectric composite ......................................................... Kim C. Benjamin, A. L. Van Buren, and S. Petrie 1687
3pEA4 Lamb waves generation in composite plates with a thin linear array of piezoelectric elements ................................................................. Thierry Demol, Pierrick Blanquet, Emmanuel Moulin, and Christophe Delebarre 1689
3pEA5 Built-in transducer design for Lamb waves generation in composite structures ........ Pierrick Blanquet, Thierry Demol, Emmanuel Moulin, and Christophe Delebarre 1691
3pEA6 Optimization of piezoelectric circular bimorph ............................................... Andrzej B. Dobrucki 1693
3pEA7 Research on inhomogeneous 1-3 PZT/polymer composite transducer .................. Xu Dalun and Zhou Tieying 1695
3pEA8 The ring type all fiber Fabry-Perot interferometer hydrophone system .......... Donglin Li and Shuquan Zhang 1697

3pED UNDERGRADUATE RESEARCH POSTER SESSION

3pED1 Nonlinear effects in the paraxial region of diffracting sound beams radiated by cylinder sources ................................................................. Svetlana V. Babenkova, Vera A. Khokhlova, and Steven G. Kargl 1699
3pED2 Sentential prosodic contour facilitates adults’ short-term memory for nonsense syllable strings ............................................................. Diana Lynn Schenck 1701
3pED3 Design and development of PC-IMAT: Teaching strategies for acoustical oceanography ...................................................... Lee Anne Hurley, Kevin M. Thomas, Murray S. Korman, John W. Schuler, and Eleanor Holmes 1703
3pED4 Sonic gas analysis ......................................................................................... Matthew V. Golden, Robert M. Keolian, and Steven L. Garrett 1705
3pED5 Use of pseudo-random codes in pulse compression ......................................... Paul Shoning, Antal Sarkady, and Currie Wooten 1707

3pPAa SONOCHEMISTRY AND SONOLUMINESCENCE: SC II

3pPAa1 Hydrodynamical perturbation effects in sonoluminescence ............................ Anatol M. Brodsky, Lloyd W. Burgess, David W. Kuhns, and Alex L. Robinson 1709
3pPAa2 Dependence of multibubble sonoluminescence intensity on the sound field in a sonochemical reactor .................................................. Hideto Mitome, Teruyuki Kozuka, Toru Tuziuti, and Liming Wang 1711
3pPAa3 Ultrasound energy transferring into liquid phase load ................................ Oleg V. Abramov, Vladimir O. Abramov, Yuri S. Astashkin, Oleg M. Gradov, and Sergey I. Nikitenko 1713
3pPAa4 Enhancement of ultrasonic cavitation yield by a bifrequency irradiation and its frequency effect .................................................. Ruo Feng, Changping Zhu, Jiangyi Xu, Zhouhua Chen, and Huamao Li 1715
3pPAa5 Ultrasonic waves in magnetic liquids: Two-phase approach and experimental results ........................................................................... Tomasz Hornowski, Mariusz Kaczmarek, Mikolaj Labowski, and Andrzej Skumiel 1717
3pPAa6 Sonofluorescence image in analogous sonochemical reactor ........................ Huamao Li, Andong Xie, Fan Zhong, Huijun Wan, Lijin Liu, and Ruo Feng 1719
3pPAb NONLINEAR ACOUSTICS I: 1. HISTORY; 2. SOLIDS; ROCKS; 3. SURFACE WAVES, PART 2

3pPAb1 Interaction of counterpropagating acoustic waves in materials with nonlinear dissipation and in hysteretic media ................................................................. 1721
Vitalyi Gusev, Hélène Bailliet, Pierrick Lotton, and Michel Bruneau

3pPAb2 Pseudo-Rayleigh and pseudo-Scholte surface acoustic solitary waves ................................................................. 1723
Vitalyi Gusev, Christ Gorieux, and Jan Thoen

3pPAb3 Nonlinear acoustics of solids: History and modern trends ................................................................. 1725
Vladimir A. Krasilnikov

3pPAb4 Measurements of third-order elasticity in isotropic solids ................................................................. 1727
Z. W. Qian and Wenhua Jiang

3pPAb5 Nonlinear acoustics of zero-volume non-bonds and cracks ................................................................. 1729
Igor Yu. Solodov

3pPAc MEMORIAL SESSION FOR ISADORE RUDNICK

3pPAc0 Isadore Rudnick memorial session ................................................................. 1731
Richard Stern, Robert Keolian, and Steven Garrett

3pPAc1 Isadore Rudnick’s contributions to nonlinear acoustics ................................................................. 1733
Robert T. Beyer

3pPAc2 Izzy Rudnick’s educational demonstrations and videos ................................................................. 1735
Robert M. Keolian

3pPAc3 Metals, superconductors, phase transitions and Izzy ................................................................. 1737
Moises Levy

3pPAc4 Dr. Mudnick, rough-on-rats Rudnick, etc. ................................................................. 1739
Steven Garrett

3pPAc5 My happy years with my mentor—Professor Isadore Rudnick ................................................................. 1741
Junru Wu

3pPAc6 Isadore Rudnick: Making waves in superfluid helium ................................................................. 1743
J. D. Maynard

3pPAc7 Isadore Rudnick: Making waves in liquid helium ................................................................. 1745
Seth J. Putterman

3pSA NONLINEAR DYNAMICS AND CHAOS

3pSA1 Vector fields and quadratic maps ................................................................. 1747
Huw G. Davies and Konstantinos Karagiozis

3pSA2 Experimental and theoretical analysis of the nonlinear dynamics and acoustics of a rattling plate ................................................................. 1749
Karen Fegelman and Karl Grosh

3pSA3 Effects of disorder and nonlinearity on the propagation of classical waves ................................................................. 1751
O. Richoux, C. Depollier, J. Hardy, and A. Brezini

3pSA4 Nonlinear vibroacoustical free oscillation method for crack detection and evaluation ................................................................. 1753
Leonid M. Gelman and Sergey V. Gorpinich

3pSA5 Nonlinear dynamic behavior of a piezoelectric 1-3 composite ................................................................. 1755
Thomas J. Royston and Brian H. Houston

3pSA6 Theoretical bases of the vibroacoustical nonlinear forced oscillation diagnostics method ................................................................. 1757
Leonid M. Gelman and Nadejda I. Bouraou

3pSP GENERAL TOPICS IN SIGNAL PROCESSING IN ACOUSTICS

3pSP1 Using acoustic impulses to detect buried objects ................................................................. 1759
C. G. Don, D. E. Lawrence, and A. J. Rogers
3pSP2 Automatic noise source recognition .................................................. 1761
Didier Dufournet, Philippe Jouenne, and Adam Rozwadowski

3pSP3 A novel octave graphic equalizer .................................................... 1763
Marija F. Hribšek, Ruža Berberski, and Dejan V. Tošić

3pSP4 Tomographic scanning acoustic microscope system .......................... 1765
Daesik Ko, Daegun Song, Gihwan Hwang, and Kyesuk Jun

3pSP5 Motion compensated high frequency synthetic aperture sonar (SAS) ........ 1767
James T. Christoff

3pSP6 A study of extracting characteristic parameters of tubular targets .......... 1769
Renqian Wang and Yingchun Li

3pUW BOTTOM GEOACOUSTIC CHARACTERIZATION
AND INVERSION II

3pUW1 Head wave data inversion for geoacoustic parameters of the ocean bottom off
Vancouver Island ................................................................. 1771
Mark C. A. Laidlaw, Oleg A. Godin, and N. Ross Chapman

3pUW2 Acoustic propagation in gassy sediments ....................................... 1773

3pUW3 Identification of inhomogeneous media using global optimization techniques .... 1775
Marcelo Bruno S. Magalhães and Roberto A. Tenenbaum

3pUW4 Sequential versus iterative methods for recovering acoustical impedance profiles of
inhomogeneous media ............................................................ 1777
Roberto A. Tenenbaum and Marcelo Bruno S. Magalhães

3pUW5 An experiment on inversion of sound profile through ray modeling ............ 1779
Yuanliang Ma, Shixing Yang, Qingzuo Chen, Xiaoquuan Jiang, Qingping Tu, and Yuanhai Sheng

3pUW6 Waveguide characterization estimation in shallow water by a vertical array ......... 1781
Dejun Jiang and Tianfu Gao

3pUW7 Error analysis of inverse algorithms for reconstructing the acoustic parameter
profile of layered media ......................................................... 1783
Jun-xuan Lin and Qing-hua Bao

4aPLa PLENARY LECTURE

4aPLa1 Fuzzier but simpler analytic models for physical acoustics and structural acoustics .... 1785
Allan D. Pierce

4aAA CASE STUDY ON THE NEW TOKYO PERFORMING
ARTS CENTER

4aAA1 Japan’s new National Performing Arts Center ...................................... 1789
Takahiko Yanagisawa

4aAA2 Acoustical design of the opera house of the New National Theatre, Tokyo, Japan .... 1791
Leo L. Beranek, Takayuki Hidaka, and Sadahiro Masuda

4aAA3 Acoustical design of the drama and experimental theatres of the New National
Theatre, Tokyo, Japan ............................................................ 1793
Leo L. Beranek, Takayuki Hidaka, and Sadahiro Masuda

4aAA4 Acoustical design of the Tokyo Opera City (TOC) concert hall, Japan ............ 1795
Takayuki Hidaka, Leo L. Beranek, Sadahiro Masuda, Noriko Nishihara,
and Toshiyuki Okano

4aAA5 Relation of acoustical parameters with and without audiences in concert halls
and a simple method for simulating the occupied state ................................ 1797
Takayuki Hidaka, Noriko Nishihara, and Leo L. Beranek

4aAA6 Objective and subjective measurement of fifteen opera houses in Europe, Japan
and Americas ................................................................. 1799
Takayuki Hidaka and Leo L. Beranek
4aAB TEMPORAL PATTERNS AND RHYTHM

4aAB1 It’s all a matter of timing: Temporal mechanisms for production and encoding of acoustic signals ............................................................ 1801
   Andrew H. Bass and Deana Bodnar
4aAB2 Temporal rhythms in the signals of insects ........................................... 1803
   T. G. Forrest
4aAB3 Stochastic resonance in the amphibian auditory system? It’s just a matter of time .... 1805
   Peter M. Narins
4aAB4 Whale voices from the deep: Temporal patterns and signal structures as adaptations for living in an acoustic medium ........................................... 1807
   Christopher W. Clark
4aAB5 Time pattern of sperm whale codas recorded in the Mediterranean sea 1985–1996 .... 1809
   G. Pavan, T. Hayward, J. F. Borsani, M. Priano, M. Manghi, and C. Fossati

4aAO ACOUSTICS OF FISHERIES AND PLANKTON II

4aAO1 Acoustic scattering models of zooplankton from several major anatomical groups:
Theory and experiment ........................................................ 1811
   Timothy K. Stanton, Dezhang Chu, and Peter H. Wiebe
4aAO2 Covariance mean variance classification (CMVC) techniques: Application to the acoustic classification of zooplankton .................................................... 1813
   Linda V. Martin Traykovski, Timothy K. Stanton, Peter H. Wiebe, and James F. Lynch
4aAO3 A DWBA-based representation of the extinction cross section of weakly scattering objects: Application to zooplankton .................................................. 1815
   Dezhang Chu and Zhen Ye
4aAO4 An in situ target strength model for Atlantic redfish ................................. 1817
   Stéphane Gauthier and George Rose
4aAO5 Sensitivity of acoustic scattering models to fish morphometry .................... 1819
   J. Michael Jech and John K. Horne
4aAO6 Quantifying intra-species variation in acoustic backscatter models ............... 1821
   John K. Horne and J. Michael Jech
4aAO7 The acoustic scattering directivities of juvenile salmonids .......................... 1823
   Thomas J. Carlson, Mark A. Weiland, and Gina L. George
4aAO8 Target strength measurements of walleye pollock (Theragra chalcogramma) .... 1825
   Jimmie J. Traynor
4aAO9 Three-dimensional acoustic measurements of zooplankton swimming behavior in the Red Sea ................................................................. 1827
   Duncan E. McGehee, Amatzia Genin, and Jules S. Jaffe

4aBVa APPLICATIONS OF MICROBUBBLE BASED ECHO CONTRAST AGENTS I

4aBVa1 Characteristics of ultrasound contrast agents ........................................... 1829
   Nico de Jong, Peter Frinking, and Ignacio Céspedes
4aBVa2 Nonlinear properties of microbubbles and applications to medical ultrasound imaging ................................................................. 1831
   Volkmar Uhlendorf, Thomas Fritzsch, Michael Reinhardt, and Frank-Detlef Scholle
4aBVa3 Harmonic imaging for microbubble contrast agent detection ....................... 1833
   Chien Ting Chin and Peter N. Burns
4aBVa4 Acoustic characterisation of Nycomed’s NC100100 contrast agent .................. 1835
   Lars Hoff, Per C. Sontum, and Jens M. Hovem

4pAAb7 Acoustical design of the Sumida Triphony Hall ........................................ 2129
Toshiko Fukuchi and Hideo Nakamura
4pAAb8 Subjective assessment of uneven distribution of reflections within a concert hall
Eugenio Collados

4pAAb9 A neural network analysis of concert hall acoustics
Fergus R. Fricke and Young Gon Han

4pAAb10 Directional dependence of the change of auditory source width by very short time-delay reflections
Masayuki Morimoto and Mariko Watanabe

4pAAb11 Reverberation time in Serbian orthodox worship spaces
Miomir Mijic

4pAAb12 An experiment to identify preference groups among concert hall listeners
M. Miklin Halstead, Johan L. Nielsen, and A. Harold Marshall

4pAAb13 On spatial variability of room acoustics measures
Johan L. Nielsen, M. Miklin Halstead, and A. Harold Marshall

4pAAb14 Acoustical design of Queensland Conservatorium of Music
Keiji Oguchi, Yasuhiro Toyota, and Minoru Nagata

4pAAb15 Estimation and analysis of acoustic parameters of ancient churches for concert performances
Tiziana Ottonello, Enrico Dassori, and Andrea Trucco

4pAAb16 Acoustic behavior of a tense-structure
Alessandro Cocchi and Lamberto Tronchin

4pAAb17 Effects of surface textures of choral reflectors
Elizabeth J. Lee

4pAAb18 Acoustical design and characteristics of Harmony Hall Fukui
Akira Ono, Suzuyo Yokose, and Katsuj Naniwa

4pAAb19 Effects of the modulated delay-time of the single reflection on subjective preference
Junko Atagi, Yoichi Ando, and Yasutaka Ueda

4pAAb20 Individual differences of subjective preference for sound fields with different preferred delay time of reflection
Souichiro Kuroki, Ippei Yamamoto, Hiroki Sakai, Hiroshi Setoguchi, and Yoichi Ando

4pAAC SPEECH INTELLIGIBILITY

4pAAC1 Modelling of acoustic parameters and speech intelligibility in long enclosures
Bridget M. Shield and Lening Yang

4pAAC2 Relationship between speech transmission index and easiness of speech perception in reverberation
Hiroshi Sato, Hiroshi Yoshino, and Muneshige Nagatomo

4pAAC3 Investigation of the speech intelligibility in the dome space
Satoshi Inoue, Masahiro Kato, Kiyoshi Sugino, and Hiroyuki Imaizumi

4pAAC4 Calculation of speech intelligibility using four orthogonal factors extracted from the autocorrelation functions of source and sound field signals
Tetsuichi Shoda and Yoichi Ando

4pAO ACOUSTICS OF FISHERIES AND PLANKTON III

4pAO1 Variation in acoustically measured abundance from repeated surveys of herring
Marek Ostrowski and Ingvar J. Huse

4pAO2 Acoustic estimates of zooplankton and micronekton biomass using an ADCP
Patrick H. Ressler, D. C. Biggs, and J. H. Wormuth

4pAO3 Monitoring the growth and mortality rates of pelagic fish with absorption spectroscopy measurements
Orest Diachok and Paul Smith

4pAO4 Measurements of snapping shrimp colonies using a wideband mobile passive sonar
Marc P. Olivieri and Stewart A. L. Glegg
Using sound to map fish spawning: Determining the seasonality and location of spawning by fishes in the family *Sciaenidae* (Seatrouts, Drums, and Croakers) within Pamlico Sound, NC 
Joseph J. Luczkovich, Stephen E. Johnson, and Mark Sprague

Using fish sounds to identify spawning activity of weakfish (*Cynoscion regalis*) and red drum (*Sciaenops ocellata*) in nature
Mark W. Sprague, Joe J. Luczkovich, and Stephen Johnson

5aAA9 Acoustic design and performance of the Bruce Mason Theatre .......... Joanne Valentine and Christopher Day

5aAA10 3D impulse response measurements on S. Maria del Fiore Church, Florence, Italy .......... Angelo Farina and Lamberto Tronchin

5aAA11 Simultaneous measurements of room-acoustic parameters using different measuring equipment .......... Tor Halmrast, Anders Gade, and Bjørn Winsvold

5aAA12 Acoustic design and measurement of a circular hall improving the subjective preference at each seat .......... Akio Takatsu, Shigeo Hase, Hiroyuki Sakai, Shin-ichi Sato, and Yoichi Ando

5aAO ACOUSTICS OF FISHERIES AND PLANKTON IV

5aAO1 Vessel avoidance of Norwegian spring spawning herring .......... Rune Vabø, Kjell Olsen, and Ingvar Huse

5aAO2 FishMASS: ADCP technology adapted to split-beam fisheries echo sounding .......... R. Lee Gordon, Len Zedel, and Tor Knutsen

5aAO3 The digital transducer, new sonar technology .......... William C. Acker and Janusz Burczynski

5aAO4 An acoustic tag "radar-type" tracking system for fish behavior studies .......... John Hedgepeth, David Fuhriman, David Geist, and Robert Johnson

5aAO5 Field trials using an acoustic buoy to measure fish response to vessel and trawl noise .......... Christopher D. Wilson

5aAO6 Noise characteristic of Japanese fisheries research vessels .......... Yoshimi Takao, Kouichi Sawada, Yoichi Miyanohana, Tsuyoshi Okumura, Masahiko Furusawa, and DooJin Hwang

5aBVa LITHOTRIPSY I

5aBVa1 ESWL—The evolution of a revolution: History, status quo and perspectives .......... Ch. Chaussy and S. Thüroff

5aBVa2 Extracorporeal shock waves act by shock wave—gas bubble interaction .......... Michael Delius and Wolfgang Eisenmenger

5aBVa3 Separation of cavitation and renal injury induced by shock wave lithotripsy (SWL) from SWL-induced impairment of renal hemodynamics .......... Andrew P. Evan, Lynn R. Willis, Bret A. Connors, James A. McAteer, James E. Lingeman, Robin O. Cleveland, Michael R. Bailey, and Lawrence A. Crum

5aBVa4 The potential of lithotriptor shockwaves for gene therapy of tumors .......... Douglas L. Miller, Richard A. Gies, Brian D. Thrall, and Shiping Bao

5aBVa5 Effects of lithotripter fields on biological tissues .......... Diane Dalecki
5aBVa6 Biomechanical effects of ESWL shock waves
Bradford Sturtevant and Murtuza Lokhandwalla

5aBVa7 Effects of tissue constraint on shock wave-induced bubble oscillations in vivo
Pei Zhong, Iulian Cioanta, Franklin H. Cocks, and Glenn M. Preminger

5aBVa8 SWL cavitation damage in vitro: Pressurization unmasks a differential response of foil targets and isolated cells
James, A McAteer, Mark A. Stonehill, Karin Colmenares, James C. Williams, Andrew P. Evan, Robin O. Cleveland, Michael R. Bailey, and Lawrence A. Crum

5aBVa9 Effect of overpressure on dissolution and cavitation of bubbles stabilized on a metal surface
Robin O. Cleveland, Michael R. Bailey, Lawrence A. Crum, Mark A. Stonehill, James C. Williams, Jr., and James A. McAteer

5aBVb MEDICAL ULTRASOUND II—PROPAgATION, MEDIA CHARACTERIZATION AND MISCELLANEOUS TOPICS

5aBVb1 Are blood clots a Biot medium?
Pierre D. Mourad and Steve G. Kargl

5aBVb2 A stratified model for ultrasonic propagation in cancellous bone
Elinor R. Hubbuck, Timothy G. Leighton, Paul R. White, and Graham W. Petley

5aBVb3 Effects of the structural anisotropy and the porosity on ultrasonic wave propagation in bovine cancellous bone
Takahiko Otani and Atsushi Hosokawa

5aBVb4 Wide-band laser-acoustic spectroscopy of proteins
Alexander A. Karabutov and Natalia B. Podymova

5aBVb5 Wide-band acoustic spectroscopy of liquid phantoms of biological tissues
Valery G. Andreev, Alexander A. Karabutov, Yury A. Pischalnikov, and Natalia B. Podymova

5aBVb6 The necessity for acoustics in the biomedical engineering program
Daniel R. Raichel and Latif M. Jiji

5aEA SONAR TRANSDUCERS

5aEA1 Finite element simulation of piezoelectric transformers
Takao Tsuchiya, Yukio Kagawa, and Hiroki Okamura

5aEA2 A tubular piezoelectric actuator and its characteristic analysis by finite element modelling
Naoto Wakatsuki, Takao Tsuchiya, Yukio Kagawa, and Kazumichi Hatta

5aEA3 Substructuring in the finite element analysis of sonar transducer arrays
J. R. Dunn, C. L. Chen, and B. V. Smith

5aEA4 Sonar simulation and display techniques
Yuhong Guo, Hong Liu, and Junying Hui

5aEA5 Modified shifted sideband beamformer for swath bathymetry sonar
Haisen Li, Lan Yao, Xinsheng Xu, and Yingzi Wu

5aEA6 Specific acoustic impedance of the ultrasonic field by the square flat transducers
Tohru Imamura

5aEA7 Estimation of equivalent circuit parameters for piezoelectric transducer using least square method
Byung-Doo Jun and Koeng-Mo Sung

5aEA8 Study of the compound structured ultrasonic transducer made of PZT/PVDF
Moo J. Kim, Dong H. Kim, and Kang L. Ha

5aMU MUSICAL ACOUSTICS PASTICHE

5aMU1 Physics of music laboratory at the University of Washington
Vladimir Chaloupka
5aMU2 Dynamic optimal tuning of electronic keyboards as they are being played .......... 2531
James E. Steck and Dean K. Roush

5aMU3 On the use of elements of piano notes to improve the identification of polyphonic piano sounds .......................................................... 2533
L. Rossi and G. Girolami

5aMU4 A new accurate model-based music synthesis technique by using scattering recurrent neural networks ........................................... 2535
Sheng-Fu Liang, Alvin W. Y. Su, and Cheng-Teng Lin

5aMU5 Musical instrument synthesis by nonregenerative nonlinear processing .......... 2537
James W. Beauchamp

5aMU6 Time-domain modeling and numerical simulation of timpani ................. 2539
Leila Rhaouti, Patrick Joly, and Antoine Chaigne

5aMU7 Modeling Chinese musical instruments ........................................ 2541
Andrew Horner and Lydia Ayers

5aNSa AIRCRAFT NOISE: GENERAL

5aNSa1 Low frequency noise around airports ............................................ 2543
M. Vallet and J. C. Bruyere

5aNSa2 Subjective response to aircraft flyover noise .................................... 2545
Sherilyn A. Brown and R. David Hilliard

5aNSa3 Low flying military aircraft noise—Operational flying ....................... 2547
Ian H. Flindell and Ralph J. Weston

5aNSa4 Converting noise level into number: A new method to quantify k-coefficients reveals distance-dependent over- and under-energetic responses around the same airport ................................................................. 2549
Karl Th. Kalveram

5aNSa5 Relational anomalies in “A” weighted and linear scale sound level measurements associated with jet aircraft departures ..................................... 2551
Errol Nelson and Allan Furney

5aNSb SOURCE NOISE ANALYSIS AND CONTROL

5aNSb1 Frequency dependent velocity scaling and small axial flow fans ............ 2553
D. A. Quinlan

5aNSb2 Noise diagnostic and reduction of a scooter engine motorcycle .............. 2555
Cho-Ihsin Lu and Jen-chieh Cheng

5aNSb3 Sound generation by turbulent non-premixed flames .......................... 2557
Sikke A. Klein and Jim B. W. Kok

5aNSb4 Investigation of centrifugal blower noises ..................................... 2559
Christopher L. Banks and Sean F. Wu

5aNSc SOUNDSCAPES —“ACOUSTICAL LANDSCAPES” IN NATURAL AND BUILT ENVIRONMENTS

5aNSc1 Supportive sound environments in building research .......................... 2561
Brigitta Berglund, Edward Hojan, and Anna Purmann

5aNSc2 Features of Japanese soundscapes recognized by foreigners: A questionnaire survey on sounds for the foreigners living in Fukuoka ....................... 2563
Shin-ichiro Iwamiya

5aNSc3 Sound design for an exhibition ..................................................... 2565
Peter Coulter

5aNSc4 Survey on the actual condition of the sound environment in commercial spaces ....... 2567
Michiko So and Sho Kimura
5aPAa SONOCHEMISTRY AND SONOLUMINESCENCE: SL I

5aPAa1 Stability in single bubble sonoluminescence ........................................ D. Felipe Gaitan and R. Glynn Holt 2569

5aPAa2 Pulse width and shape in single bubble sonoluminescence ...................... B. Gompf, R. Pecha, G. Nick, and W. Eisenmenger 2571

5aPAa3 Predictions for upscaling sonoluminescence ..................................... Sascha Hilgenfeldt and Detlef Lohse 2573

5aPAa4 Single-bubble sonoluminescence and liquid fracture .......................... A. Prosperetti 2575

5aPAa5 Conditions during multi-bubble sonoluminescence ............................. Kenneth S. Suslick, Yuri T. Didenko, and William B. McNamara, III 2577

5aPAa6 Sonoluminescence and its neighbor cavitation bubble luminescence ......... Werner H. Lauterborn, Thomas Kurz, and Reinhard Geisler 2579

5aPAa7 Influence of surfactants on the intensity of single bubble sonoluminescence ... Sascha Hilgenfeldt, Detlef Lohse, and Rüdiger Tögel 2581

5aPAa8 Radial response of single-bubble sonoluminescence to novel excitations ........ K. Hargreaves, T. J. Matula, L. A. Crum, and W. C. Moss 2583

5aPAa9 Measurements of the dynamical response of single-bubble sonoluminescence near the luminescence and extinction thresholds. ....................... T. J. Matula and L. A. Crum 2585

5aPAb ACOUSTO-OPTICS AND OPTO-ACOUSTICS

5aPAb1 Planar backward projection of transient fields obtained from optical methods .......... G. T. Clement, R. Liu, P. R. Stepanishen, and S. V. Letcher 2587

5aPAb2 Measurement of ultrasonic vector displacement with Fabry-Perot interferometer .......... M. L. Qian, Y. D. Pan, M. Deshamps, and B. Audoin 2589

5aPAb3 Two-frequency degeneracy of acousto-optic interaction in paratellurite .......... Alexander V. Yurchenko and Vladimir M. Moskalev 2591

5aPAb4 Visualization of a phase structure of sound field in a Bragg cell. ............ Vadim A. Goncharov, Leonid N. Ichenko, Vladimir M. Moskalev, Eugene N. Smirnov, and Alexander V. Yurchenko 2593

5aPAb5 Radiation acoustics—Photoacoustics and acousto-optics of penetrating radiation .......... Leonid M. Lyamshev 2595

5aPAb6 Photoacoustic signal in the system of a thin oil layer on the water surface .......... Antoni Sliwinski, Stanislaw Pogorzelski, and Janusz Szurkowski 2597

5aPP A MICROBREW OF SPEECH PERCEPTION AND HEARING IMPAIRMENT

5aPP1 Perceptual consequences of amplitude perturbations in the wavelet coding of speech . Nicolle H. van Schijndel, Tammo Houtgast, and Joost M. Festen 2599

5aPP2 The effect of spectral resolution on speech perception in a multi-talker babble background ..................................................... Bom Jun Kwon and Christopher W. Turner 2601

5aPP3 Application of auditory models to discrimination thresholds of voicing parameters .... Shari L. Campbell, Kathryn H. Arehart, Ronald C. Scherer, and Amy N. Butler 2603

5aPP4 Audio signals in domestic appliances evaluated in terms of the hearing ability of older adults .................................................. Kenji Kurakata, Yasuyoshi Kuba, Yasuo Kuchinomachi, and Kazuma Matsushita 2605

5aPP5 The effects of age and hearing impairment on the time course of backward masking .......................................................... Sara Elizabeth Gehr and Mitchell S. Sommers 2607

5aPP6 Speech intelligibility and localization in a complex environment by listeners with hearing impairments ........................................ Monica L. Hawley, Ruth Y. Litovsky, and H. Steven Colburn 2609

   Djamel Ouis and Sven G. Lindblad
5pEa2 Acoustic wave scattering from a coated cylindrical shell
Sung H. Ko and Bruce E. Sandman .................................................. 2815

5pEa3 Numerical solution of the Euler equations with high-order, compact centered
schemes ......................................................................................... 2817
John A. Ekaterinaris

5pEa4 Modeling acoustic radiation from end-initiated explosive line charges
William J. Marshall ........................................................................ 2819

5pEa5 Resonant frequencies into degeneration of hybrid longitudinal and torsional
vibration system ........................................................................... 2821
Tieying Zhou, Liqun Zhang, and Yi Xue

5pEa6 The estimation of an interior sound field by source method
Gee-Pinn James Too and Shing Maw Wang ................................. 2823

5pEb ACOUSTIC WAVEGUIDES

5pEb1 Insertion loss measurements of an acoustical enclosure by using sound power and
MLS methods ................................................................................. 2825
Pedro Cobo, Carlos Ranz, José S. Santiago, José Pons, Manuel Siguero,
and Carmen Delgado

5pEb2 Intensity measurements in various rooms/a new intensity probe
W. F. Druyvesteyn and H. E. de Bree ............................................. 2827

5pEb3 In situ absorption measurements using a transfer function technique and MLS
G. Dutilleux, T. E. Vigran, and U. R. Kristiansen .......................... 2829

5pEb4 Lumped impedance of a planar discontinuity in an acoustic waveguide
Ralph T. Muehleisen and Anthony A. Atchley ............................... 2831

5pEb5 A short water-filled pulse tube for the measurement of the acoustic properties of
materials at low frequencies ......................................................... 2833
Debra M. Kenney and Peter H. Rogers

5pEb6 Generation of low-frequency acoustic waves in electrolytes
Bronisław Żołtógórski ................................................................. 2835

5pPaa SONOCHEMISTRY AND SONOLUMINESCENCE: SL II

5pPa1 Energy focusing in bubbly flows................................................. 2837
Seth Putterman, Keith Weninger, Robert A. Hiller, and Bradley P. Barber

5pPa2 Sonoluminescence stability for gas saturations down to 0.01 Torr
Jeffrey A. Ketterling and Robert E. Apfel ..................................... 2839

5pPa3 The effects of high magnetic fields on sonoluminescence
Joseph Young, Hyung Cho, and Woowon Kang .............................. 2841

5pPa4 Computed spectral and temporal emissions from a sonoluminescing bubble
W. C. Moss, J. A. Harte, J. L. Levatin, P. W. Rambo, D. A. Young, G. B. Zimmerman,
and I. H. Zimmerman ................................................................. 2843

5pPa5 Dynamics of gas mixtures in sonoluminescence bubbles
Andrew J. Szeri and Brian D. Storey ............................................. 2845

5pPa6 Time resolved measurements of optical emission from sonoluminescence
D. Froula, R. W. Lee, W. C. Moss, and P. E. Young ......................... 2847

5pPa7 Single bubble sonoluminescence: Acoustic emission measurements with a fiber optic
probe hydrophone ......................................................................... 2849
B. Gompf, Z. Q. Wang, R. Pecha, and W. Eisenmenger

5pPa8 Luminescence from spherically and aspherically collapsing laser induced bubbles
Claus-Dieter Ohl, Olgerd Lindau, and Werner H. Lauterborn ........ 2851

5pPa9 On the theory of supercompression of a gas bubble in a liquid-filled flask

5pPa10 Observations of single-bubble sonoluminescence in micro-gravity and hyper-gravity
Jeremy E. Young, Nathaniel K. Hicks, A. C. Binner, Susan L. Richardson,
Mark J. Marr-Lyon, and Philip L. Marston ....................................... 2855

The role of the low frequency component of head related transfer function for median plane localization
Motoki Yairi, Yasuko Kuroki, Masayuki Morimoto, and Kazuhiro Iida

The AUDIS catalog of human HRTFs
Jens Blauert, Marc Brüggen, Klaus Hartung, Adelbert W. Bronkhorst, Rob Drullmann, Gerard Reynaud, Lionel Pellieux, Winfried Krebber, and Roland Sottek

A modeling of distance perception based on auditory parallax model
Yoiti Suzuki, Hae-Young Kim, Shouichi Takane, and Toshio Sone

Evidence of spatially-tuned auditory analysers
Russell L. Martin and Ester Klimkeit

Detection of Doppler-like signals
Mark A. Ericson and Lawrence L. Feth

Measurement and analysis of the structure borne sound of a fan installation:
Evaluation of source signal filtering techniques and rotational degrees of freedom
M. A. Sanderson, L. Ivarsson, and A. G. Troshin

Modelling the vibration behavior of an induction motor
C. Wang and J. C. S. Lai

Model-based shaping of vibroacoustic properties of gears
Stanislaw Radkowski

Experimental identification of mechanical joint properties
Olivier Chiello, Franck Sgard, and Noureddine Atalla

The vibroacoustical analysis of the ladle crane
Jerzy Wiciak, Marek Iwaniec, and Ryszard Panuszka

Metal and composite aircraft panels: Selection of parameters optimal from the viewpoint of acoustic fatigue lifetime
Sergey N. Baranov, Nikolay I. Baranov, Lev S. Kuravsky, and Konstantin P. Zhukov

The controversy of nasalized fricatives
John J. Ohala, Maria-Josep Solé, and Goangshiuan Ying

Aerodynamic characteristics of trills
Maria-Josep Solé, John J. Ohala, and Goangshiuan Ying

Motor equivalence in the production of /ʃ/.
Joseph S. Perkell, Melanie L. Matthies, and Majid Zandipour

Further results on the perception of place coarticulation in Taiwanese stops
Shu-hui Peng and Terrance M. Nearey

Ejectives in Tanana Athabaskan
Siri G. Tuttle

Perception of synthesised Hindi geminate and cluster sounds
Nisheeth Shrotiariya and S. S. Agrawal

Integration of acoustic cues in Spanish voiced stops
Sergio Feijóo, Santiago Fernández, and Ramón Balsa

Acoustic properties of English fricatives
Allard Jongman, Joan Sereno, Ratree Wayland, and Serena Wong

Role of F1 in the perception of voice offset time as a cue for preaspiration
Jörgen Pind

Vowel and consonant durations as cues for quantity in Icelandic
Jörgen Pind

Timing effects on successive alveolar consonants in Swedish
Robert Bannert and Peter E. Czigler

Acoustic and perceptual effects of vowel length on voice onset time in Thai stops
Chutamanee Onsuwan and Patrice Speeter Beddor
Perception of glottalized consonants in Babine/Witsuwit’en
Katharine Davis and Sharon Hargus

A perceptual experiment on Thai consonant types and tones
Rungpat Roengpitya

The nasal vowels of Iberian Portuguese: Acoustic and aerodynamic properties
Maria João Chaves Galvão

EMG evidence for the automaticity of intrinsic F0 of vowels
D. H. Whalen, Bryan Gick, Masanobu Kumada, and Kiyoshi Honda

Interacting spectral and temporal properties in Jamaican English and Jamaican Creole vowel production
Alicia J. Beckford

The effect of F3 on /U–I/ boundary
Matthew R. Buehler and Anna K. Nábělek

The effect of transition velocity and transition duration on vowel reduction in V1V2 complexes
Pierre L. Divenyi and René Carré

Acoustic correlates of 'devoiced' vowels in standard modern Japanese
J. Kevin Varden

Nasal vibration spectra in vowels
Mechtild Tronnier

Perceived vowel quantity in Swedish: Effects of postvocalic voicing
Dawn M. Behne, Peter E. Czigler, and Kirk P. H. Sullivan

Isolating the critical segment of AE /r/ and /l/ to enhance non-native perception
Reiko Kubo, John S. Pruitt, and Reiko Akahane-Yamada

English vowel production by native speakers of Beijing Mandarin
Xinchun Wang and Murray J. Munro

The effect of immersion on second language productions: The acquisition of American English /r/ and /l/ by Japanese children
Jessica C. Pruitt, Reiko Akahane-Yamada, Reiko Mazuka, and Akiko Hayashi

Modification of L2 vowel production by perception training as evaluated by acoustic analysis and native speakers
Reiko Akahane-Yamada, Winifred Strange, Jessica C. Downs-Pruitt, and Yasushi Masuda

Categorical discrimination of English and Japanese vowels and consonants by native Japanese and English subjects
J. E. Flege, S. G. Guion, R. Akahane-Yamada, and J. Downs-Pruitt

Effects of listener training on intelligibility of Chinese-accented English
Catherine L. Rogers

An instance-based model of Japanese speech recognition by native and non-native listeners
Kiyoko Yoneyama and Keith Johnson

Training American listeners to perceive Mandarin tones: A first report
Yue Wang, Allard Jongman, and Joan A. Sereno

A CALL system for teaching the duration and phone quality of Japanese tokushuhaku
Goh Kawai and Keikichi Hirose

The organization of articulator gestures: A comparison of Swedish, Bulgarian and Greenlandic
Sidney A. J. Wood

The relationship between non-native phoneme perception and the MMN
Janet W. Stack and Susan D. Dalebout

Acquisition of language-specific word-initial unvoiced stops: VOT, intensity, and spectral shape in American English and Swedish
Eugene H. Buder and Carol Stoel-Gammon

The effects of postvocalic voicing on the duration of high front vowels in Swedish and American English: Developmental data
Carol Stoel-Gammon and Eugene H. Buder
